Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: Ancient Civilizations A (MS)   Carnegie Units: 0.50

Description: Ancient Civilizations A examines the significance of geography in the development of ancient civilizations. Students will study the archeological evidence of early human societies, then move on to the development of ancient cultures. The course provides a context for the understanding of history through a survey of the geographic, political, economic, religious, and social structures of the early civilizations of Mesopotamia, Egypt, Kush, the Ancient Hebrews, and Ancient Greece. Students will analyze

the contributions of these early civilizations to the modern world.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Course Name: Current Events (HS)   **Carnegie Units: 0.50**

Description: Current Events is a one-semester, elective course structured to increase students' understanding of current issues in areas of politics, society, and economics. The course emphasizes student research; the topics chosen are broad in nature to allow for fluctuation in media coverage on common topics. Upon completing this course, students will have a greater understanding of some of the political, social, and economic issues that have dominated the news in recent years. Students will be able to find Web sites and other sources that cover these issues, and students will learn to make educated decisions as to whether the Web sites or sources

present biased or unbiased coverage. For each content unit, students will write essays that demonstrate their research efforts. Students will complete unit tests, a mid-term, and a final exam, and will also complete a research-based essay at the end of the course.

Course Name: Introduction to Anthropology (HS)   Carnegie Units: 0.50

Description: The aim of anthropology is to use a broad approach to gain an understanding of our past, present, and future to address the problems humans face in biological, social, and cultural life. This course will explore the evolution, similarities, and diversity of humankind through time. The course will look at how we have evolved from a biologically and culturally weak species to one that has the ability to cause catastrophic change. Exciting, online videos lead students through journeys to different areas of the world throughout the course.

Course Name: Introduction to Graphic Design (HS)   Carnegie Units: 0.50

Description: This one-semester course is designed to develop students' understanding and appreciation for design. By raising students' awareness of design, this course will serve as a strong foundation in the basic principles of graphic design. Students will learn to communicate visually; they will present their own ideas and information graphically by applying graphic design principles in their own work as well as interpret visual representations presented to them. The course will introduce students to problem-solving scenarios that can be solved graphically. Students will apply creativity techniques to create innovative and effective design solutions. Students will also learn about the history of design, how various design movements have contributed to the field of design today, what role design plays in society, and how the field of design relates to other facets of society. Though the course is structured around computer-assisted graphic design, other types of design are discussed as well. Students will learn to use Inkscape, an image-editing program that will be provided for them. Students will create several design compositions using this program.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: Middle School Social Studies A (MS)   Carnegie Units: 0.50

Description: Middle School Social Studies A is the first part of a two-semester course. This course provides students with the knowledge and tools essential to understanding a variety of social studies topics. Students will use visual aids such as charts, graphs, pyramids, and diagrams to understand information-gathering techniques and how to predict future population trends. Students will also apply latitude and longitude

concepts to a map to find locations. After reading timelines properly, students will identify causes and effects of historic events. By examining relative and absolute locations on maps, students will examine the different map uses and apply a compass rose and cardinal directions on a map. Students will conclude their work in this course by learning computer- and text-based research techniques that demonstrate evaluation of trustworthy sources; the ability to use all information from a dictionary; and the knowledge of when to use an atlas, gazetteer, index, and almanac.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: Middle School Social Studies B (MS)   Carnegie Units: 0.50

Description: Middle School Social Studies B is a general survey course encompassing five different units. These units will hit highlights within the subjects, with an emphasis on holistic education rather than an in-depth examination. This course is an application of the social studies skills that students learn in Middle School Social Studies A.

Course Name: United States Government A (HS)   Carnegie Units: 0.50

Description: United States Government A examines the structure and history of the U.S. government. From the United States' beginnings as a confederation to its current status as a republic, this course covers the evolution of the U.S. government from the country's inception to present day. As citizens of the United States, students will have a better understanding of how their government and their elected officials carry out the duties of government and also guarantees its citizens certain fundamental rights. This course explores the foundations of government, origins of American government, the Constitution, civil liberties, the legislative and executive branches, and the relationships between federal, state, and local governments.

Course Name: World History A (HS)	Carnegie Units: 0.50

Description: This course is the first of a two-part series which examines the history of world cultures. World History A examines theories of how humans lived before written records, including different world creation theories and how species of humans lived before Homo sapiens. Additionally, the course explores the ability of ancient civilizations to develop cities around the main rivers of the world and the subsequent rise of the world's religions. The great Greek and Roman civilizations are covered in depth, as well as the people who helped shape the success of those cultures. The course continues through time to consider the growth of kingdoms and dynasties across the world during the Middle Ages, as well as the rise of Islam.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: World History B (HS)	Carnegie Units: 0.50

Description: World History B, the second course of a two-semester series, guides students through an exploration of the growth and struggles of ancient cultures and our modern-day world. Students begin with an introduction to the Aztecs and the Incas, and then focus on both the Reformation and the Enlightenment in Europe, and also the Industrial Revolution. Students will then learn about the struggle to settle the United States; the history of the Middle East (including the Ottoman Empire); and the conflicts of the Far East (detailing Ming and Ch'ing China, Modern China, and Modern Japan). Students will also identify the causes, major battles, technologies, and outcomes of World War I and World War II. Students will end the course by examining the Cold war and world issues as they exist today.

LORRI MARTIN

Current License From: OK
Folio/License Number: 162609L
Endorsements: Mathematics
Other Qualifications: BA-Math/BA/Information
Systems   Additional Active Licenses: MN, NC

Courses Taught:

Course Name: Algebra I A (HS)	Carnegie Units: 0.50

Description: Algebra I A, the first course of a two-semester series, begins by covering the basic language of algebra: real
numbers, variables, exponents, powers, expressions, and equations. Students learn about the properties of
real numbers and practice applying strategies, concepts, and procedures for solving problems. The course
then moves on to linear equations. Students learn to use addition, subtraction, multiplication, and division to
solve equations with variables on one or both sides. They also learn to apply the distributive property.
Students learn to transform formulas, solve equations involving absolute value, and calculate measures of central tendency.

Once students have mastered linear equations, the course introduces them to functions and graphs. Students
will use relations and functions to model number relationships. They will learn to interpret, create, and analyze
various types of graphs, rules, and tables. Students will also identify and extend arithmetic sequences, graph
data on a coordinate plane, and construct stem-and-leaf plots and box-and-whisker plots. Students will also
learn to graph linear equations and to write linear equations in various forms, including slope-intercept form
and point-slope form. Lastly, the course teaches students to solve and graph linear equalities.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.
Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.
Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate

feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o Numerous in course interaction tools such as discussion

Methods of Student Contact: Email: Daily

    Snail Mail: As Needed
    Other (White Board): Daily

Course Name: Algebra I B (HS)   Carnegie Units: 0.50

Description: Algebra I B, the second course of a two-semester series, continues the study of algebra through the
exploration of systems of equations and inequalities, exponents, and exponential functions.
The course also covers radical expressions and equations, polynomials, factoring, and
quadratic equations. Rational expressions and equations are covered as well. Finally, the
course ends with a unit on rates, proportions, probability, and counting principles.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Name: Algebra II A (HS)   Carnegie Units: 0.50

Description: Algebra II A, the first of a two-semester course, begins with a review of Algebraic properties. Students will study properties and applications of real numbers, exponents and radicals, polynomials, rational expressions, equations and identities, additive and multiplicative inverses, arithmetic expressions, order of operations, variables, name and notations, algebraic expressions, monomials, terms, simplifying algebraic expressions, problem solving using expressions, equations and identities, and trigonometric functions.

Course Name: Calculus A (HS)   Carnegie Units: 0.50

Description: Calculus A, the first of a two-semester course, centers on limits, differentiation, and applications of differentiation. Topics in this course apply to many problems studied in physics and engineering. Students review algebra concepts and learn fundamental calculus concepts along with working problems for limits and derivatives. Students apply rules for finding different derivatives as well as learn the applications of the derivative. After finding the area under a curve using several different methods, students will complete an essay assignment that applies this to a real-world problem. Students conclude the course by applying theorems and demonstrating knowledge of basic rules for anti-derivatives.

Course Name: Calculus B (HS)	Carnegie Units: 0.50

Description: Calculus B, the second of a two-semester course, focuses on how to calculate and graph anti-derivatives and integrals as well as how to apply these techniques to real-world problems. In addition, students also study topics in sequences and series. Students find the derivatives of several different functions and apply these derivatives in application problems. Students calculate volume, surface area, and arc length by working with applications of the integral. Students differentiate and integrate multidimensional functions.

Course Name: Consumer Math A (HS)	Carnegie Units: 0.50

Description: Consumer Math A focuses on basic math skills used in everyday life with the goal of developing intelligent consumers. The practical applications of math are studied using real-world situations. Personal finances are emphasized through the study of personal earnings, which includes the practical knowledge and application of pay rates and other elements. Students also identify and calculate benefits, taxes, and deductions from pay checks. Students manage all components of checking and savings accounts as well as explain the concepts of saving money and setting financial goals. Students have the opportunity to analyze and graph business functions and learn about credit and life insurance.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: Consumer Math B (HS)   Carnegie Units: 0.50

Description: Consumer Math B is an extension of Consumer Math A and continues the focus on basic math skills used in everyday life with the goal of developing intelligent consumers. The practical applications of math are studied using real-world situations. Personal finances are emphasized through the study of personal earnings and the elements of business, credit, and life insurance. Prerequisites include Algebra I and Geometry.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet
Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Methods of Student Contact: Email: Daily
Telephone: Daily
Snail Mail: As Needed

Course Name: Fundamentals of Math A (MS)	Carnegie Units: 0.50

Description: Fundamentals of Math A is the first half of a series of two courses that prepare the student for success in
higher-level math classes through the study of integers, exponents and factors, operations with fractions,
ratios and proportions, and expressions and equations.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: Fundamentals of Math B (MS)	Carnegie Units: 0.50

Description: Fundamentals of Math B is the last half of a series of two courses designed to prepare the student for higher-level math classes. Areas of emphasis include functions and inequalities, data, statistics and probability, the basics of geometry, and two- and three-dimensional geometry. Students solve and graph inequalities, linear equations, and linear functions. Students also plot, describe, and find data using several methods to figure outcomes and probabilities. Using basic geometry techniques, students classify and find shapes and angles. Students also find area, understand the Pythagorean Theorem, and find volume and surface area for different shapes. The course offers students illustrations, examples, and practice exercises before formative assessments.

Course Name: Geometry A (HS)	Carnegie Units: 0.50

Description: Geometry A, the first course of a two-semester series, teaches students the logic and information they will
need to solve proof problems and to prove mathematical theorems. Emphasis in this course is on the logic of
geometry, angles and lines, triangles and congruency, quadrilaterals, similarity, and right triangles. Students
enrolling in this course should have successfully completed one year of Algebra.

| Course Name: Math Proficiency Exam-OverPass (HS) | Carnegie Units: 0.50 |

Description: The Mathematics portion of the Over Pass series addresses the academic content standards from middle school mathematics through Algebra I and basic geometry. Students initially complete a diagnostic test of multiple-choice questions to identify weaknesses. Students are then provided with individual lesson plans to help improve their math skills. Upon completion of the lesson plan, several mastery examinations are available to reassess and restructure a student's lesson plan for more studying. Some basic topics included within this course are number sense, computational skills with decimals, fractions, percents, basic statistics, data analysis and probability, measurement, mathematical reasoning, and many algebra and geometry applications. The Math exam covers 53 objectives and includes 80 multiple-choice items.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point.

o   Numerous in course interaction tools such as discussion threads and wikis.

Methods of Student Contact:	Email: Daily
	Telephone: Daily
	Snail Mail: As Needed

| Course Name: Pre-Algebra A (MS) | Carnegie Units: 0.50 |

Description: Pre-Algebra A is the first of two courses designed to prepare the student for more advanced work in Algebra
The basic concepts of arithmetic and the practical applications of mathematics are used to focus on
intigers, equations, factors and exponents, fractions and equations, ratios, proportions and percents, rational
numbers, and solving equations with rational numbers. The course offers graphics, explanations, and practice
exercises before formative assessments.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.
Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards

alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Course Name: Trigonometry (HS)	Carnegie Units: 0.50

Description: Trigonometry, a one-semester course, prepares students for further studies of mathematical topics in Calculus and Physics. The course begins by teaching students to measure angles in degrees and radians, arc lengths, and chords. Students then study the basic trigonometric functions (sine, cosine, and tangent) and their inverses, as well as the relationships of these functions to chords and right triangles. In addition, students apply the study of trigonometric functions and identities to find angles of elevation and depression and solve right triangles.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Courses Taught:

Course Name: Career and Technology Skills A (HS)	Carnegie Units: 0.50

Description: Career and Technology Skills A is the first part of a two-semester course that covers skills to prepare students for workplace success. Students will explore their interests, aptitudes, and skills plus their individual learning styles in order to find possible career matches. Students will also consider their own values and expectations as they learn and practice the skill of goal setting. Students will apply their knowledge of learning styles and memory techniques to enhance their study skills.

The course presents an overview of various computing programs that are vital to success in the workplace. These include word processing, spreadsheet, presentation, and database software. Practice opportunities will help students master the use of such software. Open source software programs will be provided to the students.

Students will explore a variety of career options and use the steps in the decision-making process to develop their own career plans. A variety of post-high school opportunities will be discussed for achieving career goals. Students will create and evaluate job application materials, learn to search for job opportunities, and conduct a successful job interview. Finally, the course will present the role of government in business; global, national, and local economic trends; and how these factors affect working people.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: Career and Technology Skills B (HS)   **Carnegie Units: 0.50**

Description: Career and Technology Skills B is the second part of a two-semester course that covers the problem-solving, decision-making, and communication skills necessary to succeed in the workplace. Students will learn about workplace policies and procedures, growth and promotion opportunities, and the social and technological systems of any business. They will also understand legal and ethical issues related to their personal rights as workers.

Students will employ a variety of technology skills to prepare presentations and communications scenarios for different purposes and audiences. The course explains effective leadership skills and provides examples of critical assessment, evaluation, and negotiation. Students will learn the steps of the problem-solving process to identify causes and seek effective resolutions. Students will also learn to plan a project and respond to problems and risks. Finally, students will learn skills for time management, financial responsibility, and methods to deal with stress.

Curriculum Alignment? Yes **Alignment Process:** Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: Computer Literacy A (MS/HS)　　　　　　　　Carnegie Units: 0.50

Description: This one-semester course is designed to develop students' overall understanding of computers and to enhance student skills in both basic computer functions and in the use of various types of software. By providing technical instruction and several practice opportunities, this course provides a strong foundation in basic computer literacy. After completing this course, students will be able to recognize computer hardware and use Windows XP and Mac OS operating systems. Students also will learn to use various software

applications (word processing, spreadsheet, and presentation software), which are based on OpenOffice.org unless otherwise noted.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible. Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is

controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point.

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: Computer Literacy B (HS)   Carnegie Units: 0.50

Description: This one-semester course is designed to build on basic computer skills teach students real-world problem solving methods using advanced computer skills. Students will increase their knowledge of spreadsheet, database, programming, and PDF functions in order to solve problems, make decisions, and analyze and interpret technology's role in our society. Finally, the course will culminate in a career exploration, multi-media project. Students will work in various software applications (word processing, spreadsheet, and presentation software), which are based on OpenOffice.org unless otherwise noted.

Course Name: Web Development (HS)   **Carnegie Units: 0.50**

Description: There's more to creating a Web site than writing HTML code and uploading files. A good Web site must be designed before it's created. This one-semester Fundamentals of Web Development course is designed to introduce students to both Web site design and development. The course will introduce students to the basic

Web site design principles, which can be used to both design and evaluate their own sites and to evaluate other sites. Students will learn development languages such as HTML and CSS. In additions, students will be introduced to two software programs: GIMP, an image-editing program and Nvu, a Web development program.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: AP® Environmental Science	Carnegie Units: 0.50

Description: The unifying themes in this course include understanding science as a process, energy conversions as the basis for all ecological processes, the earth as an interconnected system made up of natural systems which humans change, and environmental problems and how human survival depends on sustainable systems. This course involves a strong laboratory and field investigation component to reinforce fundamental concepts and principles. Skills such as critical observation, interpretation and analysis of data, applying solutions to problems, and evaluating the quality and validity of conclusions will be developed. Before taking this course, students should have completed one year of physical science, one year of life science, and a year of algebra. A course in earth science is advantageous but not necessary. The content in this course aligns to the scope and sequence specified by the College Board and to widely used textbooks. © 2007 AP is a registered trademark of collegeboard.com, Inc.

| Course Name: Chemistry A (HS) | Carnegie Units: 0.50 |

Description: Chemistry A, the first of a two-semester course, introduces students to the basic concepts of observation, the history of chemistry, and how to reason and use the scientific method. The course also emphasizes the study of matter and energy with focus on identifying differences between states of matter and physical and
chemical properties. Fundamental properties of measurement in chemistry, along with how to use scientific notation, will be introduced early in the course, and these concepts will be reinforced throughout the remaining units. The relation between atomic models and the Periodic Table will be explained, along with ways to use these concepts as tools in the study of chemistry. The remaining units of the course will focus on ions and ionic compounds, molecular compounds, acids and bases, the mole concept, chemical masses, and chemical equations.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Methods of Student Contact: Email: Daily
Telephone: Daily
Snail Mail: As Needed
Other (White Board): Daily

Course Name: Chemistry B (HS)	Carnegie Units: 0.50

Description: Chemistry B, the second of a two-semester course, focuses on chemical bonding, molecular geometry and symmetry, Lewis structures, valence shell electron pair repulsion (VSEPR) theory, and resonance structures. In addition, this course introduces thermochemistry, chemical kinetics, and electrochemistry. Along with concepts and definitions, calculation methodology for pH, pOH, and buffering are provided. Key concepts of organic chemistry, nuclear and environmental chemistry, biochemistry, and analytical chemistry are explained. The course ends with a discussion of industrial processes, energy, and careers related to chemistry.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned

to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality.

The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Course Name: Earth Science A (HS)	Carnegie Units: 0.50

Description: Earth Science A, the first course of a two-semester series, is an intense study of geology as a problem-solving science. This main focus in this course is on the earth's structure and mapping, the earth's mineral composition, rocks and the rock cycle, plate tectonics and the plate tectonic theory of development, the ocean floor, volcanoes and earthquakes, mountain building and crustal deformations, the earth's history and geologic timeline, and the forces of weathering including running water, groundwater, glaciers, wind, and waves.

| Course Name: Earth Science B (MS) | Carnegie Units: 0.50 |

| Description: | Earth Science B, the second course of a two-semester series, begins with a review of earth's layered structure. Then the theory of plate tectonics is described and students learn to relate movement of the earth's plates to geological events such as earthquakes, mountain building, and volcanic eruptions. Next, students learn how earth's surface is shaped by weathering. Various renewable and non-renewable resources are described. Ecological topics include energy and nutrient exchange in ecosystems, interactions of organisms in an ecosystem, and factors affecting populations. The course concludes with an introduction to space science. |

complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to

within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: Life Science B (MS)	Carnegie Units: 0.50

Description: Life Science B, the second course in a two-semester series, begins with an exploration of the basic structure of life. The course covers all the body's systems, including the muscular, skeletal, digestive, excretory, reproductive, circulatory, respiratory, immune, nervous, and endocrine systems. The course also discusses the different systems' related diseases and prevention factors.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Course Name: American History A (HS)   Carnegie Units: 0.50

Description: American History A, the first course of a two-semester series, provides an overview of the birth of our nation and the struggle to preserve the union during the Civil War. It offers a closer examination of American history from Reconstruction to the beginning of the twentieth century. Major topics of study include the changes in the South after the Civil War, westward expansion, industrialization, progressivism, and the emergence of the United States as a world power.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: American History B (MS)   **Carnegie Units: 0.50**

Description: American History B, the second course of a two-semester series, examines American history from the Federalist era to the American Civil War. This course explores the development of political parties, the Louisiana Purchase and westward expansion, and the issues that divided the country and ultimately led to the Civil War.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance

Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: Ancient Civilizations A (MS)   Carnegie Units: 0.50

Description: Ancient Civilizations A examines the significance of geography in the development of ancient civilizations. Students will study the archeological evidence of early human societies, then move on to the development of ancient cultures. The course provides a context for the understanding of history through a survey of the
geographic, political, economic, religious, and social structures of the early civilizations of Mesopotamia, Egypt, Kush, the Ancient Hebrews, and Ancient Greece. Students will analyze the contributions of these early civilizations to the modern world.

Course Name: Current Events (HS)   Carnegie Units: 0.50

Description: Current Events is a one-semester, elective course structured to increase students' understanding of current issues in areas of politics, society, and economics. The course emphasizes student research; the topics chosen are broad in nature to allow for fluctuation in media coverage on common topics. Upon completing this course, students will have a greater understanding of some of the political, social, and economic issues that have dominated the news in recent years. Students will be able to find Web sites and other sources that cover these issues, and students will learn to make educated decisions as to whether the Web sites or sources

present biased or unbiased coverage. For each content unit, students will write essays that demonstrate their research efforts. Students will complete unit tests, a mid-term, and a final exam, and will also complete a research-based essay at the end of the course.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: Middle School Social Studies A (MS)   Carnegie Units: 0.50

Description: Middle School Social Studies A is the first part of a two-semester course. This course provides students with the knowledge and tools essential to understanding a variety of social studies topics. Students will use visual aids such as charts, graphs, pyramids, and diagrams to understand information-gathering techniques and how to predict future population trends. Students will also apply latitude and longitude concepts to a map to find locations. After reading timelines properly, students will identify causes and effects of historic events. By examining relative and absolute locations on maps, students will examine the different map uses and apply a compass rose and cardinal directions on a map. Students will conclude their work in this course by learning computer- and text-based research techniques that demonstrate evaluation of trustworthy sources; the ability to use all information from a dictionary; and the knowledge of when to use an atlas, gazetteer, index, and almanac.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and

NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: United States Government A (HS)   Carnegie Units: 0.50

Description: United States Government A examines the structure and history of the U.S. government. From the United States' beginnings as a confederation to its current status as a republic, this course covers the evolution of the U.S. government from the country's inception to present day. As citizens of the United States, students will have a better understanding of how their government and their elected officials carry out the duties of government and also guarantees its citizens certain fundamental rights. This course explores the foundations of government, origins of American government, the Constitution, civil liberties, the legislative and executive branches, and the relationships between federal, state, and local governments.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request,

Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality.

Course Name: World Geography A (HS)   **Carnegie Units: 0.50**

Description: World Geography A provides the student with a sense of the vastness of the world. Specific areas of study include basic map skills, the major themes of geography (location, place, human-environmental interaction, movement, and region), and earth science fundamentals (seasons, weather, and water features). The final area of study focuses on North America by analyzing the continent's physical characteristics, population, culture, history and government, and the economy.

Course Name: World History A (HS)	Carnegie Units: 0.50

Description:	This course is the first of a two-part series which examines the history of world cultures. World History A examines theories of how humans lived before written records, including different world creation theories and how species of humans lived before Homo sapiens. Additionally, the course explores the ability of ancient civilizations to develop cities around the main rivers of the world and the subsequent rise of the world's religions. The great Greek and Roman civilizations are covered in depth, as well as the people who helped shape the success of those cultures. The course continues through time to consider the growth of kingdoms and dynasties across the world during the Middle Ages, as well as the rise of Islam.

Course Name: World History B (HS)	Carnegie Units: 0.50

Description: World History B, the second course of a two-semester series, guides students through an exploration of the growth and struggles of ancient cultures and our modern-day world. Students begin with an introduction to the Aztecs and the Incas, and then focus on both the Reformation and the Enlightenment in Europe, and also
the Industrial Revolution. Students will then learn about the struggle to settle the United States; the history of
the Middle East (including the Ottoman Empire); and the conflicts of the Far East (detailing Ming and Ch'ing China, Modern China, and Modern Japan). Students will also identify the causes, major battles, technologies, and outcomes of World War I and World War II. Students will end the course by examining the Cold war and
world issues as they exist today.

Current License From: OK
Folio/License Number: 183680L
Endorsements: Elem Edu/Lang Arts/Math Middle School

Courses Taught:

Other Qualifications: BS-Elem Ed. Additional
Active Licenses: KS, MN, NV

Course Name: Language Arts I A (MS)	Carnegie Units: 0.50
Description: Language Arts I A is the first of a two-part series of courses and provides language instruction at the word	

and sentence levels with writing application. The emphasis in this course is on the proper usage of the English

language. Focus areas include theory and practice of the eight parts of speech, the parts of a sentence, the

types of clauses, and capitalization and punctuation.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and

state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: Sixth Grade English A (MS)   Carnegie Units: 0.50

Description: Sixth Grade English A is the first in a two-course series. In this course, students will become active participants
in analyzing different forms of text. They will gain an understanding of the different types of literature. This
course focuses on the narrative and expository forms of writing. Students will gain a better understanding of
appropriate grammar, spelling, and vocabulary through instruction in the writing process, responses to literature, and direct instruction. Students will be required to read the novel Hatchet, by Gary Paulson, in addition to several short stories.

Course Name: Sixth Grade English B (MS)   Carnegie Units: 0.50

Description: Sixth Grade English B, the second in a two-course series, emphasizes reading persuasive texts, expository texts, narratives, and poetry. Students will explain the effects of common literary devices in fictional and non-fictional texts. Students will identify and utilize organizational patterns when writing. Students will also improve their abilities to identify main ideas in writing and to achieve consistency of ideas between paragraphs when creating multi-paragraph expository and persuasive compositions. Students will gain a better understanding of appropriate grammar, spelling, and vocabulary through instruction in the writing process, responses to literature, and direct instruction.

Course Name: Sixth Grade Math A (MS) **Carnegie Units: 0.50**

Description: Sixth Grade Math A, the first half of a two-course series, begins with a review of the four arithmetic operations with whole numbers and introduces students to algebraic concepts such as variables and expressions.
Students will understand and apply the Order of Operations when simplifying expressions and will be able to
accurately solve problems using decimals, fractions, and integers, as well as be able to compare and order
positive and negative numbers, fractions, decimals, and mixed numbers. Students will identify variables and
begin solving one- and two-step equations. The course offers students illustrations, examples, and practice
exercises before formative assessments.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.
Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally,

Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Methods of Student Contact: Email: Daily

Course Name: Sixth Grade Math B (MS)   Carnegie Units: 0.50

Description: Sixth Grade Math B, the second half of a two-course series, introduces students to ratios, proportions, and percents. Students will use proportions to solve problems and calculate percentages. They will be able to convert between fractions, decimals, and percentages accurately. Students will understand how to collect data, identify the mean and median, and calculate the mean and range of the given data set. They will learn how to determine the most effective way of displaying data using charts and graphs, and how to analyze the results of their data collection to check for bias.

The course also introduces geometry, covering identifying angles, finding the unknown angle

when using the
properties of complementary and supplementary angles, and identifying a polygon given its
characteristics.
Students will also be able to differentiate between congruent and similar figures and
determine the area and
perimeter of geometric figures. Students will also work with solid figures and will solve
problems involving
surface area and volume. Students will be accountable for determining theoretical and
experimental probabilities and be able to make predictions based on their calculations.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Name: Fitness Fundamentals II (MS/HS)   Carnegie Units: 0.50

Description: This one-semester course builds on students' knowledge of fitness gained in Fitness Fundamentals I by challenging students to find new exercises they enjoy with emphasis on the five components of physical fitness. Students will measure and assess their fitness levels and establish goals for improvement. The course provides information so that students learn to prevent injuries and benefit from an active lifestyle. The advantages of good nutrition choices and learning to measure and manage the body mass index (BMI) are also discussed. Coupled with a minimum requirement of physical activity which includes cardio, strength training, and flexibility, the course provides opportunities for students to complete written assignments, journal entries, and discussions. Content provided by Carone Fitness®

Course Name: Personal Health & Safety including Sex Ed (MS/H   Carnegie Units: 0.50

Description: Personal Health and Safety with Sex Education helps students examine all facets of their health—mental, physical, and social—and provides tools for living a healthy, informed, and balanced life. Students will examine the particulars of mental health, from self esteem to mental illnesses such as depression. Students will learn
the mechanics of stress and ways to manage it, along with the impact violence has on young people and families. The course emphasizes conflict management skills as well as methods for effective communication. Students will learn the basics of first aid, from handling minor medical emergencies to more serious injury
scenarios, plus ways to stay safe within the home and when driving.

Students will explore all systems of the body, the parts of those systems, and the functions of each system. After learning the benefits of exercise, students will develop fitness plans for themselves to help establish lifelong habits. Students will understand what constitutes a healthy diet and learn ways to prevent and manage eating disorders. Students will also examine the physical, mental, emotional, and social changes that adolescents typically experience. In addition, this course conveys the risks of sexual activity, such as unplanned pregnancy and sexually transmitted diseases. Students will learn options for eliminating these risks from their lives. Students will examine an overview of infectious and non-infectious diseases, how these diseases affect the body, and how they can be prevented. Students will understand the dangers of smoking and how to break the habit; the effects of alcohol, peer pressure, and methods to get help for alcohol abuse; and the effects of medicine and illegal drugs and the risks associated with both categories. Students will also examine how government agencies provide health-related services to the public and also monitor workplace, product, and environmental safety.

Course Name: Running (MS/HS)	Carnegie Units: 0.50

Description: This one-semester course is suitable for beginning, intermediate, and advanced runners and offers a variety of training schedules for each. In addition to reviewing the fundamental principles of fitness, students will learn about goals and motivation, levels of training, running mechanics, safety and injury prevention, appropriate attire, running in the elements, good nutrition and hydration, and effective cross-training. While this course focuses mainly on running for fun and fitness, it also briefly explores the realm of competitive racing. Throughout this course, students will participate in a weekly fitness program involving running. Students will also be expected to record their weekly activities and heart rate. Coupled with a minimum requirement of physical activity which includes cardio, strength training, and flexibility, the course provides opportunities for students to complete written assignments, journal entries, and discussions. This course provides activities to cover a minimum of 120 days.

Curriculum Alignment? Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point.

o   Numerous in course interaction tools such as discussion threads and wikis.

MANDY VICHIS

Current License From: CA
Folio/License Number: 90043172
Endorsements: Spanish

Courses Taught:

Other Qualifications: BA-Spanish Additional Active Licenses: AZ, CO, OK

Course Name: Spanish I A (HS)	Carnegie Units: 0.50

Description: Spanish I A, the first of a two-semester course, focuses on the fundamentals of the Spanish language starting with basic vocabulary, grammar, word conjugation, sentence structure, and gender agreement. Content provided by powerspeaK 12, Inc. and is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Courses Taught:

Course Name: English I A (HS)	Carnegie Units: 0.50

Description: English I A, the first course of a two-semester series, is designed to help students achieve language proficiency and to write paragraphs that demonstrate focus, effective support, unity, and coherence. This course focuses on developing writing skills at the word, sentence, and paragraph levels.

Throughout this course, students will practice writing as they complete vocabulary and sentence writing assignments and exercises, a short research assignment, a definition paragraph, and a process paragraph. Students will learn and apply rules for nouns, pronouns, verbs, adjectives, adverbs, articles, prepositions, conjunctions, capitalization, abbreviations, and phrases and clauses. Students will also learn and complete exercises to become familiar with the components of effective paragraph writing. Finally, students will read The Odyssey and learn about the adventures of Odysseus, his family, friends, and enemies.

All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: English II A (HS)   Carnegie Units: 0.50

Description: English II A, the first course of a two-semester series, emphasizes the development of skills in the interpretation of poetry and short stories. Students will also learn the correct methodology to develop essays. Interspersed within the literature and writing units will be content in the identification and proper use of English grammar. Additionally, students will read the Greek play Antigone and write a narrative essay that draws on this reading and their life experiences.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on

sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of

methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Course Name: English III A (HS)	Carnegie Units: 0.50

Description: Students will write essays following the 5-Paragraph Essay model and learn to incorporate the writing process
into their thinking and writing. In their writing, students will also demonstrate usage of transitional expressions
for several different purposes. Native American mythology, history, and culture will be explored, and students
will write about these elements. Students will read selections from the Colonial, Revolutionary, Early National,
and Romantic periods, as well as read and understand the themes found in Hawthorne's The Scarlett Letter.

Course Name: English III B (HS)   Carnegie Units: 0.50

Description: English III B, the second course of a two-semester series, surveys the major American short story writers and
poets from the Realism period to the present day. Students will also read and analyze a longer work from the
Realism period, Mark Twain's novel The Adventures of Huckleberry Finn. The course focuses on a variety of writing skills, including narrative, expository, persuasive, and reflective essays. In addition, students will learn

correct dictionary usage, how to design and present a speech, and how to fill out a Personal Data Sheet, a
key component in filling out job applications.

Course Name: English Proficiency Exam-OverPass (HS)   Carnegie Units: 0.50

Description: The English/Language Arts portion of the Over Pass series addresses academic content standards through early high school. Students initially complete a diagnostic test of both multiple-choice questions and a writing task to identify weaknesses. Students are then provided with individual lesson plans to help improve their English/Language Arts skills. Upon completion of the lesson plan, several mastery examinations are available to reassess and restructure a student's lesson plan for more studying. The reading topics that are covered within this course include word analysis and fluency, vocabulary development, informational reading, and literary response and analysis. The writing portion covers writing

strategies, applications, and conventions. Within the writing portion, students must generate a response to literature, an informational passage, or a writing prompt. Each of the English/Language Arts exams covers 27 objectives and includes 72 multiple choice items and one written response item.

Curriculum Alignment?　　Yes　　Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model:　　Asynchronous, Internet

Student Interaction Monitored and Assessed:　　All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined

classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point.

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: Language Arts I A (MS)   Carnegie Units: 0.50

Description: Language Arts I A is the first of a two-part series of courses and provides language instruction at the word
and sentence levels with writing application. The emphasis in this course is on the proper usage of the English
language. Focus areas include theory and practice of the eight parts of speech, the parts of a sentence, the
types of clauses, and capitalization and punctuation.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each

unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Name: Life Skills (MS/HS)	Carnegie Units: 0.50

Description: Life Skills, a one-semester course, presents high school students with helpful information in the form of entertaining and interactive games, activities, and quizzes in order to prepare students for life after high school. Whether their choice is college, technical school, the military, or a job, this course teaches basic skills needed in every avenue of life. In addition to providing strategies for taking the ACT and SAT tests, this course provides an informative timeline to help students stay on schedule with required tasks for graduating from high school and entering the outside world. Consumer protection, establishing credit, buying a car, and renting an apartment for the first time are a few of the topics covered throughout this course. Students will be required to demonstrate their knowledge of banking, managing, saving, and spending money by engaging in fun activities from start to finish.

Course Name: Sixth Grade English A (MS)   Carnegie Units: 0.50

Description: Sixth Grade English A is the first in a two-course series. In this course, students will become active participants
in analyzing different forms of text. They will gain an understanding of the different types of literature. This
course focuses on the narrative and expository forms of writing. Students will gain a better understanding of
appropriate grammar, spelling, and vocabulary through instruction in the writing process, responses to literature, and direct instruction. Students will be required to read the novel Hatchet, by Gary Paulson, in addition to several short stories.

Course Name: Sixth Grade English B (MS)   Carnegie Units: 0.50

Description: Sixth Grade English B, the second in a two-course series, emphasizes reading persuasive texts, expository
texts, narratives, and poetry. Students will explain the effects of common literary devices in fictional and non-
fictional texts. Students will identify and utilize organizational patterns when writing. Students will also improve
their abilities to identify main ideas in writing and to achieve consistency of ideas between paragraphs when
creating multi-paragraph expository and persuasive compositions. Students will gain a better understanding
of appropriate grammar, spelling, and vocabulary through instruction in the writing process, responses to
literature, and direct instruction.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance

Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the

need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: TuneUp Reading ® (MS, HS) | **Carnegie Units: 0.50**

Description: TuneUp Reading ® is a one-semester, customizable program designed to meet the needs of individualstudents over the full reading spectrum. Each student begins the program by taking a diagnostic prescriptive that places the student at an appropriate starting point in the program. Within the program, each student gains comprehension, vocabulary, and fluency skills by reading age-appropriate stories and performing vocabulary exercises. The design of TuneUp Reading ® specifically helps native Spanish speakers learn to read in English using the program's optional Spanish audio instructions. TuneUp Reading ® not only helps the low-literacy student, it enhances the reading skills of the traditional student and prepares college bound students to succeed on entrance exams. Content provided by Failure Free Reading® .

Course Name: American History A (HS)	Carnegie Units: 0.50

Description: American History A, the first course of a two-semester series, provides an overview of the birth of our nation and the struggle to preserve the union during the Civil War. It offers a closer examination of American history from Reconstruction to the beginning of the twentieth century. Major topics of study include the changes in the South after the Civil War, westward expansion, industrialization, progressivism, and the emergence of the United States as a world power.

Course Name: Ancient Civilizations A (MS) Carnegie Units: 0.50

Description: Ancient Civilizations A examines the significance of geography in the development of ancient civilizations. Students will study the archeological evidence of early human societies, then move on to the development of ancient cultures. The course provides a context for the understanding of history through a survey of the geographic, political, economic, religious, and social structures of the early civilizations of Mesopotamia, Egypt, Kush, the Ancient Hebrews, and Ancient Greece. Students will analyze the contributions of these early civilizations to the modern world.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and

frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o Numerous in course interaction tools such as discussion threads and wikis.

Course Name: Ancient Civilizations B (MS)   Carnegie Units: 0.50

Description: Ancient Civilizations B examines the significance of geography in the development of ancient civilizations. The course provides a context for the understanding of history through a survey of the geographic, political, economic, religious, and social structures of the early civilizations of India, the early civilizations of China, and through the development of Rome. Students will analyze the contributions of these early civilizations to the modern world.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.

Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate

feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Course Name: Current Events (HS)   Carnegie Units: 0.50

Description: Current Events is a one-semester, elective course structured to increase students' understanding of current issues in areas of politics, society, and economics. The course emphasizes student research; the topics chosen are broad in nature to allow for fluctuation in media coverage on common topics. Upon completing this course, students will have a greater understanding of some of the political, social, and economic issues that have dominated the news in recent years. Students will be able to find Web sites and other sources that cover these issues, and students will learn to make educated decisions as to whether the Web sites or sources
present biased or unbiased coverage. For each content unit, students will write essays that demonstrate their research efforts. Students will complete unit tests, a mid-term, and a final exam, and will also complete a research-based essay at the end of the course.

Course Name: Introduction to Anthropology (HS)   Carnegie Units: 0.50

Description: The aim of anthropology is to use a broad approach to gain an understanding of our past, present, and future to address the problems humans face in biological, social, and cultural life. This course will explore the evolution, similarities, and diversity of humankind through time. The course will look at how we have evolved from a biologically and culturally weak species to one that has the ability to cause catastrophic change. Exciting, online videos lead students through journeys to different areas of the world throughout the course.

Course Name: Middle School Social Studies A (MS)   Carnegie Units: 0.50

Description: Middle School Social Studies A is the first part of a two-semester course. This course provides students with the knowledge and tools essential to understanding a variety of social studies topics. Students will use visual aids such as charts, graphs, pyramids, and diagrams to understand information-gathering techniques and how to predict future population trends. Students will also apply latitude and longitude concepts to a map to find locations. After reading timelines properly, students will identify causes and effects of historic events. By examining relative and absolute locations on maps, students will examine the different map uses and apply a compass rose and cardinal directions on a map. Students will conclude their work in this course by learning computer- and text-based research techniques that demonstrate evaluation of trustworthy sources; the ability to use all information from a dictionary; and the knowledge of when to use an atlas, gazetteer, index, and almanac.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) Course outlines and objectives are created based on these standards. After the course is developed based on this outline, the course is aligned again to the national and state standards to ensure accurate and complete alignment. Core courses are externally verified for their alignment to state content standards through a third-party correlations and standards alignment company.

Following the course syllabus and any other necessary introductory materials, students are taken through each unit of study linearly. Each unit begins with a unit introduction which includes unit objectives, a list of key concepts, and key questions or practice problems. Each lesson that follows the introduction includes an online text and may also include videos, images, and/or interactive media. Frequent self-directed practice opportunities are provided throughout the course. After a series of lessons, students will complete assessments, which may include written papers, essay, other file-based products, and myriad other assessment types that can be electronically graded for immediate feedback to students. File-based assessments like paper and essays provide students with clear directions and grading expectations. Each unit ends with a unit

exam, and each course also includes a midterm and final exam. Assessment weights can be found within the course syllabus or through each student's My Grades section of the LMS.

Course Evaluation: Advanced Academics' instructional design team, which includes subject matter experts, writers, editors, and multimedia developers, work continuously to ensure course quality. The Instructional Design team regularly updates and improves the digital content of our courses to reflect the latest changes in standards criteria, pedagogical trends, current events and technology.

Advanced Academics uses the ADDIE (Analysis, Design, Development, Implementation, and Evaluation) instructional design model, Gagne's Nine Events of Instruction, and Bloom's Taxonomy to design and develop course content and assessments. Additionally, Advanced Academics courses contain multimedia elements, such as images, photographs, videos, animations, and interactive applications.

Since 2002, Advanced Academics has been an accredited institution through the Distance Learning Division of CITA (Commission on International Trans-Regional Accreditation) and NCA CASI's (North Central Association Commission on Accreditation and Improvement). Over 50 Advanced Academics courses are also NCAA approved.

All Advanced Academics' course content is customizable at the customer and even student level. Any desired changes to content, assessments, and/or questions are possible.

Each Advanced Academics semester course begins with a course syllabus. The course syllabus includes course objectives, unit objectives, a list of assessments and their relative weights, and a suggested timeline for course completion. The course completion timeline is controlled dynamically for each student enrollment and is predefined by the maximum course term allowed by a district.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: All online teachers are highly qualified according to NCLB and state definitions with an average of 12–15 years of combined classroom/online teaching experience. Teachers have obtained a bachelor's or master's degree and have extensive experience teaching a variety of student populations.

Students are viewed as individuals with individual learning needs. Teachers support and encourage through a variety of methods for issues pertaining to grades, assessments, understanding of objectives taught and progress in the course. Scaffolding is used in order to ensure that a student is reaching full potential. As online educators, teachers understand the need to communicate with parents/district administrators and frequently discuss student progress/grades with appropriate individuals. Qualified subject area teaching assistants also assist with tutoring, grading, and communication. To provide assistance 24/7, our student support team handles both general and technical issues. All personnel can be reached by phone, secure Instant Help messaging or ClassMail, our internal e-mail messaging system. ClassMail messages are responded to within 24 hours.

Our delivery system structure is configured to be flexible and sensitive to a student's scheduling needs while simultaneously focused on student progress. Advanced Academics has developed the following tools:

o   An instant help, Chat and whiteboard system, through which a student can always connect with a teacher, teaching assistant, and with customer support 24/7.

o   A Course Completion Engine that can be customized to the needs of a school district, a school, and even to an individual student.

o   A Virtual Teacher program that spreads the milestones of an individual course across the term of that course and displays it on a calendar and via a progress bar to help communicate to the student exactly where he or she is in coursework at any given point

o   Numerous in course interaction tools such as discussion threads and wikis.

Course Name: United States Government A (HS)   Carnegie Units: 0.50

Description: United States Government A examines the structure and history of the U.S. government. From the United States' beginnings as a confederation to its current status as a republic, this course covers the evolution of the U.S. government from the country's inception to present day. As citizens of the United States, students
will have a better understanding of how their government and their elected officials carry out the duties of
government and also guarantees its citizens certain fundamental rights. This course explores the foundations of government, origins of American government, the Constitution, civil liberties, the legislative and executive branches, and the relationships between federal, state, and local governments.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Upon request, Advanced Academics can provide correlations to the Montana Content Standards & Performance Descriptors.
Advanced Academics also uses national standards criteria as defined by organizations as INACOL (International Association for K-12 Online Learning.) | Course Name: World History A (HS) | Carnegie Units: 0.50 |

Description: This course is the first of a two-part series which examines the history of world cultures. World History A examines theories of how humans lived before written records, including different world creation theories and how species of humans lived before Homo sapiens. Additionally, the course explores the ability of ancient civilizations to develop cities around the main rivers of the world and the subsequent rise of the world's religions. The great Greek and Roman civilizations are covered in depth, as well as the people who helped shape the success of those cultures. The course continues through time to consider the growth of kingdoms and dynasties across the world during the Middle Ages, as well as the rise of Islam.

Curriculum Alignment?   Yes   Alignment Process: Advanced Academics develops its courses based on sound practices of instructional design and are aligned to key state and national standards. Course Name: World History B (HS)   Carnegie Units: 0.50

Description: World History B, the second course of a two-semester series, guides students through an exploration of the growth and struggles of ancient cultures and our modern-day world. Students begin with an introduction to the Aztecs and the Incas, and then focus on both the Reformation and the Enlightenment in Europe, and also the Industrial Revolution. Students will then learn about the struggle to settle the United States; the history of the Middle East (including the Ottoman Empire); and the conflicts of the Far East (detailing Ming and Ch'ing China, Modern China, and Modern Japan). Students will also identify the causes, major battles, technologies, and outcomes of World War I and World War II. Students will end the course by examining the Cold war and world issues as they exist today.

Delivery Model: Asynchronous, Print, Internet

Student Interaction Monitored and Assessed: All chats can be recorded and instructors meet with management monthly to discuss goals and plans for effectiveness. Allied National High School also requires instructors to discuss problems as they arise so as to eliminate any issues.

Methods of Student Contact: Telephone: As Needed

Course Name: Microsoft Excel and PowerPoint	Carnegie Units: 0.50

Description: The course, Microsoft® Excel and PowerPoint, combines text and technology to create an effective learning experience. It consists of two units, divided into 17 lessons. In each lesson, students will learn how to perform important software functions and solve problems. Each week, students will be required to complete a homework assignment and quiz. At the end of each unit, students will take a unit exam.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Allied National High School first makes sure this course meets National Standards Alignment, and has content specialists test the course before being sent to the accreditors for approval. Instructors also quality controled this course before it was released.

Delivery Model: Asynchronous, Print, Internet

Student Interaction Monitored and Assessed: All chats can be recorded and instructors meet with management monthly to discuss goals and plans for effectiveness. Allied National High School also requires instructors to discuss problems as they arise so as to eliminate any issues.

Student Interaction Monitored and Assessed: All chats can be recorded and instructors meet with management monthly to discuss goals and plans for effectiveness. Allied National High School also requires instructors to discuss problems as they arise so as to eliminate any issues.

Course Name: Pre-Calculus A   Carnegie Units: 0.50

Description: Pre-Calculus A applies concepts from Algebra and Geometry to real-world situations. The content includes: solving systems of linear equations, inequalities, parametric equations, and operations with matrices and inverse trigonometric functions. It covers definitions, graphs, identities, properties, and applications of transcendental functions and their graphs, as well as right and oblique triangles and vector notation. Prerequisites: Students must successfully pass Algebra 2A & 2B.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Allied National High School first makes sure this course meets National Standards Alignment, and has content specialists test the course before being sent to the accreditors for approval. Kristina Mirkadyrova   Other Qualifications: Master of Arts - Education/Linguistics
Bachelor of Arts - Political Science

Courses Taught:

Course Name: English 10A   Carnegie Units: 0.50

Description: English 10A is an interactive online class that guides students through a standards-aligned English textbook. Areas of study include: Plot and Setting; Character, Narrator and Voice; Comparing Themes; Irony and Ambiguity; and Symbolism and Allegory. Authors include Alice Walker and Edgar Allan Poe. Prerequisites: Students must successfully pass English 9B.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Allied National High

School first makes sure this course meets National Standards Alignment, and has content specialists test the course before being sent to the accreditors for approval. Instructors also quality controled this course before it was released.

Delivery Model: Asynchronous, Print, Internet

Student Interaction Monitored and Assessed: All chats can be recorded and instructors meet with management monthly to discuss goals and plans for effectiveness. Allied National High School also requires instructors to discuss problems as they arise so as to eliminate any issues.

Methods of Student Contact: Telephone: As Needed

Course Name: English 10B   Carnegie Units: 0.50

Description: English 10B is an enjoyable online class that guides Students through a standards-aligned English textbook. Areas of study include: Poetry; Evaluating Style; Biographical and Historical Approach; Drama; and Consumer and Workplace Documents. Students will read William Shakespeare's The Tragedy of Julius Caesar. Prerequisites: Students must successfully pass English 10A.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Methods of Student Contact: Telephone: As Needed

Course Name: Geography A   Carnegie Units: 0.50

Description: Geography A covers the basic elements in the study of geography. It begins with our position in the universe and ending with population concentrations. Then we travel to North America, Central and South America, Europe, and then Russia, stopping in each region to consider natural environments, history, culture, and the special challenges faced today by those particular populations. We also take a moment to reflect on what may lie ahead.

Curriculum Alignment?   No   Alignment Process:

Jesse Nason   Other Qualifications: Bachelor of Science - Mathematics (CSU Long Beach)

Courses Taught:

Course Name: Algebra 1A   Carnegie Units: 0.50

Description: Algebra 1A teaches algebraic concepts that can be applied to real-world and mathematical situations. The content includes: the structures and properties of real numbers; data analysis concepts and methods; exponents, absolute value, square roots, radicals, and scientific notation; various solution strategies; coordinate geometry and graphing; various ways of analyzing and expressing patterns, relations and functions; and the use of variables and algebraic expressions.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Methods of Student Contact: Telephone: As Needed

Course Name: Algebra 2A   Carnegie Units: 0.50

Description: Algebra 2A broadens the concepts learned in Algebra 1. The content includes: an understanding of the construction of numbers, operations, and properties; polynomials; solving and graphing quadratic equations; the use of matrices and determinants to solve nonlinear systems; solving equations with three variables; using functional notation and the arithmetic of functions to solve equations. Prerequisites: Stduents must successfully pass Algebra 1A & 1B and Geometry.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Allied National High School first makes sure this course meets National Standards Alignment, and has content specialists test the course before being sent to the accreditors for approval. Methods of Student Contact: Telephone: As Needed

Course Name: Pre-Algebra A   Carnegie Units: 0.50

Description: Pre-Algebra A lays the foundation for further studies in Algebra in order to solve problems and evaluate expressions through real-world applications. The content includes: basic algebra tools; integers; equations; factors and fractions; rational numbers; and ratio, proportion and percent. Students will read one lesson per week and complete the assigned homework.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Allied National High School first makes sure this course meets National Standards Alignment, and has content specialists test the course before being sent to the accreditors for approval. Amy Paul   Other Qualifications: Bachelor of Arts - Marine Biology (Sonoma State University)

Courses Taught:

Course Name: Chemistry A   Carnegie Units: 0.50
Description: Chemistry A will introduce students to the study of the physical world by examining: Matter and Energy, Atoms and Moles, The Periodic Table, Ions and Ionic Compounds, Covalent Compounds, Chemical Equations and Reactions, Stoichiometry, and the Causes of Change. Students will explore these concepts through textbook readings, online assignments, and hands-on laboratory activities. Prerequisites: Students must successfully pass Biology A and B, Algebra 1A and 1B.
Curriculum Alignment?   No   Alignment Process:
Course Evaluation: This course is evaluated according to WASC and DETC standards. Allied National High School first makes sure this course meets National Standards Alignment, and has content specialists test the course before being sent to the accreditors for approval. Methods of Student Contact: Telephone: As Needed

Course Name: Health/Life Skills A   Carnegie Units: 0.50

Description: Health/Life Skills A teaches students about healthy living. Topics include: building a healthy foundation; physical activity and nutrition; mental and emotional health; and personal care and body systems. The course consists of four units, divided into 18 lessons. Students will be required to read an online lesson along with excerpts from the textbook, and complete weekly homework assignments and quizzes. At the end of each unit, students will take a unit exam, with the last containing the final exam.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Allied National High School first makes sure this course meets National Standards Alignment, and has content specialists test the course before being sent to the accreditors for approval. Methods of Student Contact: Telephone: As Needed

Course Name: MTAPPP A & B   Carnegie Units: 1.00

Description: MTAPPP A & B provides you with a sound basis of medical-related concepts. You will learn the terminology you need to succeed in the health care industry. The classes cover medical terminology, anatomy, physiology, pathology, and pharmacology. You'll receive a solid foundation, which can prepare you for a future career as a medical coder, biller or transcriptionist. (These are two separate classes that take place over two semesters. Each class is worth 0.5 credits)

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Allied National High School first makes sure this course meets National Standards Alignment, and has content specialists test the course before being sent to the accreditors for approval. Methods of Student Contact: Telephone: As Needed

Course Name: Oceanography	Carnegie Units: 0.50

Description: Oceanography is simply the science of the ocean. In this course, students will get to know the ocean world — its origins, structure, chemistry, circulation, and movement (waves and tides). Students will explore the various communities that exist in this giant ecosystem, as well as how humans affect the sea and how the sea affects humans.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: This course is evaluated according to WASC and DETC standards. Methods of Student Contact: Telephone: As Needed

Course Name: Real Estate Assistant A & B	Carnegie Units: 1.00

Description: Real Estate Assistant A & B provides students with an overview of the real estate industry. Students will learn skills specific to a real estate office, such as preparing documents, inputting listings, holding open houses, maintaining client records, prospecting for potential clients, and more. The courses prepare students to enter the ever-growing area of real estate in an entry-level capacity. (These are two separate classes that take place over two semesters. Each class is worth 0.5 credits)

Curriculum Alignment?   No   Alignment Process:

No teachers have been assigned to the following courses.

Course Name: Algebra I Essentials   Carnegie Units: 1.00

Description: Algebra I Essentials provides a streamlined curriculum focused on the mastery of critical skills and the understanding of key algebraic concepts, preparing students to recognize and work with these concepts. Topics include an Introductory Algebra review; measurement; an introduction to functions, and problem solving with functions; graphing; linear equations, and systems of linear equations; an introduction to polynomials; and probability.

To assist students for whom language presents a barrier to learning or who are not reading at grade level, Algebra I includes audio resources in both Spanish and English.

The content is based on the National Council of Teachers of Mathematics (NCTM) standards and is aligned to state standards.

Prerequisites: Introductory or Pre-Algebra

Recommended Grades: 8, 9, 10

Length: Two Semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities --thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
- Email/Message Center
- Teacher moderated online class discussions
- Real time office through a synchronous chat/whiteboard

environment, by email and/or by phone
- Telephone
- Written and comprehensive feedback on assignments
- Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Methods of Student Contact: Telephone: As Needed

Course Name: Algebra II Essentials   Carnegie Units: 1.00

Description: Algebra II Essentials provides a streamlined curriculum that builds on the algebraic concepts covered in Algebra I. Topics include conic sections; functions and their graphs; quadratic functions; inverse functions; and advanced polynomial functions. Students are introduced to rational, radical, exponential and logarithmic functions; sequences and series; and data analysis.

The content is based on the National Council of Teachers of Mathematics (NCTM) standards and is aligned to state standards.

Prerequisites: Algebra I

Recommended Grades: 11, 12

Length: Two Semesters

Curriculum Alignment? Course Name: American Literature   Carnegie Units: 1.00

Description: American Literature is a general studies program in literature and composition, organized as a survey of American literature. It can stand alone as a complete year of general study in English without a specific prerequisite, but its modular design allows flexibility in how the program is used in the classroom—teachers may use a single unit, lesson, or activity to supplement regular class content. American Literature expands upon and deepens understanding of literary and communication skills covered in Critical Reading and Effective Writing, including reading, writing, language appreciation and aesthetics, listening and speaking, viewing and representing, and research.

Within these general topic areas, special emphasis is placed on: writing expository, research, and creative compositions; honing critical and analytical skills through close readings of literary, historical, expository, and functional documents; using context strategies and an understanding of etymology to build vocabulary; and practicing communication skills in online discussions.

Reading selections cover a variety of genres and voices in literature and expository prose. Students read a survey of American literature from colonial to contemporary eras. They are encouraged to respond critically and personally to these works and to use them as a context for thinking about the unique and universal aspects of culture. They learn and practice skills for workplace communication in special activities, and each unit features an engaging interactive Web exploration that covers core topics in media literacy. Finally, students practice gathering, evaluating, synthesizing, presenting, and documenting information in a unit dedicated to writing research reports.

The content is based on the National Council of Teachers of English (NCTE) standards and aligned to state standards.

Prerequisites: 10th Grade English

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
- Email/Message Center
- Teacher moderated online class discussions
- Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
- Telephone
- Written and comprehensive feedback on assignments
- Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
 Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Course Name: American Literature Essentials   Carnegie Units: 1.00

Description: American Literature Essentials is a streamlined course in literature and composition, organized as a survey of American literature. It can stand alone as a complete year of general study in English without a specific prerequisite, but its modular design allows

flexibility in how the program is used in the classroom—teachers may use a single unit, lesson, or activity to supplement regular class content. American Literature builds literary and communication skills, including reading, writing, language appreciation and aesthetics, listening and speaking, viewing and representing, and research.

Within these general topic areas, special emphasis is placed on: writing expository, research, and creative compositions; honing critical and analytical skills through close readings of literary, historical, expository, and functional documents; using context strategies and an understanding of etymology to build vocabulary; and practicing communication skills.

Reading selections cover a variety of genres and voices in literature and expository prose. Students read a survey of American literature from colonial to contemporary eras. They learn and practice skills for workplace communication in special activities, and each unit features an engaging interactive Web exploration that covers core topics in media literacy. Finally, students practice gathering, evaluating, synthesizing, presenting, and documenting information in a unit dedicated to writing research reports.

The content is based on the National Council of Teachers of English (NCTE) standards and aligned to state standards.

Prerequisites: 10th Grade English

Recommended Grades: 11, 12

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities --thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

Course Name: AP French Language and Composition   Carnegie Units: 1.00

Description: AP French Language students apply their French grammar and vocabulary knowledge and their listening, reading, speaking, and writing skills to a wide variety of real-world contexts. Students learn to speak fluently and accurately, write complicated compositions, and comprehend native speakers. The equivalent of a college-level language course, AP French Language prepares students for the AP Exam and for further study of French language, culture, and literature.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: 3-4 years of French or equivalent native fluency

Recommended for qualified AP students

Length: Two semesters

Course Name: APER - AP Biology   Carnegie Units: 0.00

Description: AP Exam Review is an online test preparation resource that prepares students for the Advanced Placement exams. Like other test prep resources, AP Exam Review provides students opportunities for practice on questions typical of those found on the actual exam. However, AP Exam Review goes considerably beyond typical test prep. Diagnostic assessments provide a way for students to determine their own level of proficiency and identify areas that require more study. Going a step further, AP Exam Review includes the actual instructional material to assist a student in building skills and developing conceptual understanding. Personalized study plans that are generated based on performance on the diagnostic tests direct each student to the relevant material for further study to ensure that he or she is well-prepared for success on the AP exam.

To ensure student success, AP Exam Review helps students understand what to expect on exam day. Students have plenty of opportunity to practice with multiple choice questions that are formatted like the AP exam. Sample free-response questions from previous AP exams familiarize students with the exam format and rigor. And real student answers to free response questions — complete with actual College Board scores — provide benchmarks for differing levels of proficiency. All of this helps each student become more comfortable and confident as they approach exam day.

Diagnostic assessments provide a way for students to determine their own level of proficiency and identify areas that require more study. Going a step further, AP Exam Review includes the actual instructional material to assist a student in building skills and developing conceptual understanding. Personalized study plans that are generated based on performance on the diagnostic tests direct each student to the relevant material for further study to ensure that he or she is well-prepared for success on the AP exam.

To ensure student success, AP Exam Review helps students understand what to expect on exam day. Students have plenty of opportunity to practice with multiple choice questions that are formatted like the AP exam. Sample free-response questions from previous AP exams familiarize students with the exam format and rigor. And real student answers to free

response questions — complete with actual College Board scores — provide benchmarks for differing levels of proficiency. All of this helps each student become more comfortable and confident as they approach exam day.

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities --thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
• Email/Message Center
• Teacher moderated online class discussions
• Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
• Telephone
• Written and comprehensive feedback on assignments
• Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
 Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Methods of Student Contact: Telephone: As Needed

Course Name: APER - AP Psychology   Carnegie Units: 0.00

Description: AP Exam Review is an online test preparation resource that prepares students for the Advanced Placement exams. Like other test prep resources, AP Exam Review provides students opportunities for practice on questions typical of those found on the actual exam. However, AP Exam Review goes considerably beyond typical test prep. Diagnostic assessments provide a way for students to determine their own level of proficiency and identify areas that require more study. Going a step further, AP Exam Review includes the actual instructional material to assist a student in building skills and developing conceptual understanding. Personalized study plans that are generated based on performance on the diagnostic tests direct each student to the relevant material for further study to ensure that he or she is well-prepared for success on the AP exam.

Course Name: Biology Essentials   Carnegie Units: 1.00

Description: Biology Essentials offers a streamlined curriculum that focuses on the mastery of basic biological skills, concepts, and models that are important for students to know and apply in everyday life. The course begins with the study of cell and molecular biology, and covers experimental design; chemistry and the biochemical basis of life; cell structure and function; basic metabolism; and genetics. Building on this foundation is an exploration into evolution, biodiversity, organismal biology, and ecology. As part of the study of vertebrates, the structure and function of major organ systems and biological processes in humans are introduced. Optional teacher-graded labs encourage students to apply the scientific method.

The content is based on the National Science Teachers Association (NSTA) standards and aligned to state standards.

Prerequisites: None

Recommended Grades: 9, 10, 11, 12

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Methods of Student Contact: Telephone: As Needed

Course Name: French II Essentials   Carnegie Units: 1.00

Description: French II Essentials is a streamlined course that teaches students to communicate more confidently about themselves, as well as about topics beyond their own lives—both in formal and informal address. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Vocabulary includes terms in cooking, geography, and architecture. Language structure and grammar includes verb forms, tenses, moods and uses, impersonal constructions, and reported speech. Students deepen their knowledge of French speaking regions and cultures by learning about history, literature, culture and contemporary issues.

The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Prerequisites: French I or the equivalent

Recommended Grades: 9, 10, 11, 12

Length: Two semesters

Curriculum Alignment?　　　Yes　　　Alignment Process:　　　Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation:　　　Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities --thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model:　　　Asynchronous

Student Interaction Monitored and Assessed:　　　Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
•　　Email/Message Center
•　　Teacher moderated online class discussions
•　　Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
•　　Telephone
•　　Written and comprehensive feedback on assignments
•　　Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
 Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Course Name: Fundamental Math　　　　　　　　　　　　　　　　Carnegie Units: 1.00
Description:　　　Fundamental Math is a comprehensive course that explores foundational concepts in math.

Students master basic skills, develop an understanding of key concepts and are challenged to extend and apply their knowledge. Topics include basic number concepts such as whole numbers, counting, and place value; advanced number concepts such as rounding, exponents, and negative numbers; addition and subtraction; and multiplication and division. The course also covers fractions; operations with fractions; decimals, percents, and ratios; problem solving; basic concepts in geometry; and measuring shapes.

To assist students for whom language presents a barrier to learning or who are not reading at grade level, Fundamental Math includes audio resources in both Spanish and English.

The content is based on the National Council of Teachers of Mathematics (NCTM) standards and is aligned to state standards.

Prerequisites: None

Recommended Grades: 6, 7 or for remediation

Length: Two semesters

Course Name: Music Appreciation   Carnegie Units: 1.00

Description: Music Appreciation introduces the student to the history, theory, and genres of music, from the most primitive surviving examples, through the classical to the most contemporary in the world at large. The course is offered in a two-semester, stand-alone format: The first semester covers primitive musical forms, classical music, and American jazz. The second semester presents the rich modern traditions, including: gospel, folk, soul, blues, Latin rhythms, rock and roll, and hip-hop.

The course explores the interface of music and social movements and examines how the emergent global society and the Internet is bringing musical forms together in new ways from all around the world.

To comply with state standards for the Arts, a student "performance practicum" is required for full credit each semester. The performance practicum requirement can be met by participation in supervised instrumental or vocal lessons, participation in a church or community choirs, community musical performances, or anything that is structured to meet at regular intervals and legitimately provides opportunities for students to build vocal and/or instrumental skills. Parents or guardians will be required to validate their children's regular participation in the chosen performance practicum.

Course Name: Physical Science	Carnegie Units: 1.00

Description: Physical Science is a comprehensive course that provides students with an understanding of the nature and structure of matter, the characteristics of energy, and the societal implications of physical science concepts. Using the scientific method – observation, data collection, analysis, hypothesis and conclusion, students are encouraged to extend their knowledge through the development of scientific explanations, hypotheses and conclusions. Topics include an introduction to kinematics, including gravity and two-dimensional motion; force; momentum; waves; electricity; atoms; the Periodic Table of Elements; molecular bonding; chemical reactivity; gases; and an introduction to nuclear energy.

The content is based on the National Science Teachers Association (NSTA) standards and aligned to state standards.

Prerequisites: None

Recommended Grades: 8, 9, 10, 11, 12

Length: Two semesters

Curriculum Alignment?　　Yes　　Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities --thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model:　　Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
• Email/Message Center
• Teacher moderated online class discussions
• Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
• Telephone
• Written and comprehensive feedback on assignments
• Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Course Name: Skills for Health Essentials   Carnegie Units: 0.50

Description: Skills for Health is a streamlined skills-based health education course designed for general education students in grades 9 through 12. Skills for Health helps students develop knowledge, attitudes, and essential skills in (1) mental and emotional health; (2) nutrition; (3) lifelong physical activity; (4) substance use and abuse; (5) injury prevention and safety; (6) growth and development; and (7) personal health, environmental conservation, and community health resources.

Through real-life simulations that engage and motivate, students apply skills such as accessing valid health information, self-management, analyzing internal and external influences, interpersonal communication, decision-making, goal setting, and advocacy. There are multiple opportunities for practice and assessment integrated throughout. Students who complete Skills for Health build the skills they need to protect, enhance, and promote their own health and the health of others.

The content is based on the National Science Teachers Association (NSTA) standards and aligned to state standards.

Course Name: Spanish I Essentials | Carnegie Units: 1.00

Description: Spanish I Essentials is a streamlined course that teaches students to greet people, describe family and friends, talk about hobbies, and communicate about other topics, such as ecology, travel, and medicine. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Vocabulary includes school subjects, parts of the body, words to describe people, and idiomatic phrases. Language structure and grammar instruction includes the verb system, adjective agreement, formal and informal address, reflexive verbs, and past tense. Students explore words used in different Spanish-speaking regions, and learn about the cultures of Spanish speaking countries and regions within and outside Europe.

The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Course Name: Spanish II Essentials   Carnegie Units: 1.00

Description: Building on Spanish I concepts, Spanish II Essentials is a streamlined course that teaches students to communicate more confidently about themselves, as well as about topics beyond their own lives—both in formal and informal situations. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Students expand their vocabulary in cooking, geography and architecture. Language structure and grammar includes verb forms, tenses, moods and uses, impersonal constructions, and reported speech. Students deepen their knowledge of Spanish speaking regions and cultures by learning about history, literature, culture and contemporary issues.

The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Course Name: U.S. and Global Economics   Carnegie Units: 0.50

Description: U.S. and Global Economics is a comprehensive course that provides an introduction to key economic principles. Students gain an understanding of choices they must make as producers, consumers, investors, and taxpayers. They have ample opportunity to develop their points of view and apply what they learn to the promotion of civic action. Topics include an examination of markets from both a historic and current perspective; basics of supply and demand; study of the theories of early economic philosophers such as Adam Smith and David Ricardo; theories of value; the concept of money and how it evolved; the role of banks, investment houses and the Federal Reserve; Keynesian economics; the productivity, wages, investment and growth involved in capitalism; unemployment, inflations, and the national debt; and a survey of markets in areas such as China, Europe, and the Middle East.

The content is based on standards from the National Council for History Education (1997), the National Center for History in the Schools (1996), and the National Council for Social Studies (1994), and is aligned to state standards.

Prerequisites: U.S. Government and Politics is recommended, but not required

Course Name: U.S. Government and Politics Essentials   Carnegie Units: 0.50

Description: U.S. Government and Politics Essentials offers a streamlined curriculum that uses the perspective of political institutions to explore the history, organization, and functions of the United States Government. Beginning with the Declaration of Independence and continuing to the present day, the course explores the relationship between individual Americans and our governing bodies. It covers the political culture of our country, and gains insight into the challenges faced by presidents, congress people, and other political activists. It also covers the roles of political parties, interest groups, the media, and the Supreme Court. Students learn to use primary historical documents as evidence as they are presented with past events.

The content is based on standards from the National Council for History Education (1997), the National Center for History in the Schools (1996), and the National Council for Social Studies (1994), and is aligned to state standards.

Course Name: World History Essentials   Carnegie Units: 1.00

Description: World History Essentials offers a streamlined curriculum that uses multiple perspectives to trace the development of civilizations around the world from prehistory to the present. The course covers major events in world history including the development and influence of human-geographic relationships, political and social structures, economics, science and technology, and the arts. Students investigate the major religions and belief systems throughout history and learn about the importance of trade and cultural exchange. Other topics include the development of agriculture, the spread of democracy, the rise of nation states, the industrial era, the spread of imperialism, and the issues and conflicts of the 20th century. Students learn to use primary historical documents as evidence as they are presented with past events.

The content is based on standards from the National Council for History Education (1997), the National Center for History in the Schools (1996), and the National Council for Social Studies (1994), and is aligned to state standards.

Course Name: Writing and Grammar Essentials　　　　Carnegie Units: 0.50

Description:　　Writing and Grammar Essentials develops key language arts skills necessary for high school graduation and success on high stakes exams through a semester of interactive instruction and guided practice in composition fundamentals. The course is divided into ten mini-units of study. The first two are designed to build early success and confidence, orienting students to the writing process and to sentence and paragraph essentials through a series of low-stress, high-interest hook activities. In subsequent units, students review, practice, compose and submit one piece of writing. Four key learning strands are integrated throughout: composition practice, grammar skill building, diction and style awareness, and media and technology exploration. Guided studies emphasize the structure of essential forms of writing encountered in school, in life, and in the work place. Practice in these forms is scaffolded to accommodate learners at different skill levels.

The content is based on the National Council of Teachers of English (NCTE) standards and aligned to state standards.

Prerequisites: None

Recommended Grades: 8, 9, 10, 11, 12

Length: One semester

Curriculum Alignment?　　Yes　　Alignment Process:　　Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation:　　Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities -

-thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
•   Email/Message Center
•   Teacher moderated online class discussions
•   Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
•   Telephone
•   Written and comprehensive feedback on assignments
•   Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
 Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Lee Ash

Courses Taught:

Course Name: AP Statistics	Carnegie Units: 1.00

Description: AP Statistics gives students hands-on experience collecting, analyzing, graphing, and interpreting real-world data. They will learn to effectively design and analyze research studies by reviewing and evaluating real research examples taken from daily life. The next time they hear the results from another poll or study, they will know whether the results are valid. As the art of drawing conclusions from imperfect data and the science of real world uncertainties, statistics plays an important role in many fields. The equivalent of an introductory college-level course, AP Statistics prepares students for the AP Exam and for further study in science, sociology, medicine, engineering, political science, geography, and business.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: Algebra II or Math Analysis

Recommended for qualified AP students

Length: Two semesters

Mark Bach

Courses Taught:

Course Name: AP U.S. History	Carnegie Units: 1.00

Description: AP U.S. History analyzes and explores the economic, political, and social changes in America since Columbus. Students master historical knowledge and critical analysis, build reading, writing, and communication skills, and discover how historical events have contributed to American culture. In the process, they'll learn how decisions and events of the past continue to have profound effects on the world today and how knowledge of the causes behind past events can influence future decisions. By the end of the course, students will be ready to put their factual knowledge to work by weighing evidence and interpreting problems presented by historians. The equivalent of an introductory college-level course, AP U.S. History prepares students for the AP Exam and for further study in history, political science, economics, sociology, and law.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: At least a B-grade in most recent social studies course

Recommended for qualified AP students

Length: Two semesters

Course Name: World History   **Carnegie Units: 1.00**

Description: World History is a comprehensive course that uses multiple perspectives to trace the development of civilizations around the world from prehistory to the present. Students are encouraged to use their knowledge of critical points in history to develop their points of view and apply what they have learned to the promotion of civic action in a rapidly globalizing world. The course explores how human-geographic relationships, political and social structures, economics, science and technology, and the arts have developed and influenced life in these civilizations. Students investigate the major religions and belief systems throughout history and learn about the importance of trade and cultural exchange. Other topics include the development of agriculture, the spread of democracy, the rise of nation states, the industrial era, the spread of imperialism, and the issues and conflicts of the 20th century.

The content is based on standards from the National Council for History Education (1997), the National Center for History in the Schools (1996), and the National Council for Social Studies (1994), and is aligned to state standards.

Prerequisites: None

Recommended Grades: 8, 9, 10

Folio/License Number: 20028649

Courses Taught:

Course Name: Critical Reading and Effective Writing   Carnegie Units: 1.00

Description: Critical Reading and Effective Writing offers a balanced curriculum that develops both academic and life skills. Concepts are presented in creative and lively ways that reinforce learning goals and engage students. Literary selections include short fiction and poetry from around the globe, Shakespearean and modern drama works, as well as two contemporary novels. Non-fiction selections feature historical correspondence, diaries, logs, and famous courtroom arguments. Life reading skills target forms, applications, and work-related communication. Throughout both semesters students build active reading strategies as they question, predict, clarify, and evaluate events and ideas presented in text.

The writing program builds confidence in young writers by targeting control of organization, effective sentences, and word choice. Students use the writing process and receive timely, detailed feedback on all written work. Grammar review and vocabulary development are included in every unit. Web explorations support media literacy and encourage students to be discerning consumers of print and non-print information.

The content is based on the National Council of Teachers of English (NCTE) standards and aligned to state standards.

Prerequisites: 9th Grade English

Recommended Grades: 10, 11, 12

Course Name: U.S. Government and Politics   Carnegie Units: 0.50

Description: U.S. Government and Politics is a comprehensive course that uses the perspective of political institutions to explore the history, organization, and functions of the United States Government. Students are encouraged to use their knowledge of the structures and processes of governing to develop their own views on current political issues and apply what they have learned to the promotion of civic action. Beginning with the Declaration of Independence and continuing to the present day, the course explores the relationship between individual Americans and our governing bodies. It takes a close look at the political culture of our country and gains insight into the challenges faced by presidents, congress people, and other political activists. It also covers the roles of political parties, interest groups, the media, and the Supreme Court. Students learn to use primary historical documents as evidence as they are presented with past events.

The content is based on standards from the National Council for History Education (1997), the National Center for History in the Schools (1996), and the National Council for Social Studies (1994), and is aligned to state standards.

Course Name: U.S. History   Carnegie Units: 1.00

Description: U.S. History is a comprehensive course that traces the political, social, economic and cultural heritage of the United States through four centuries of change and development. Students will learn about the Native American, European, and African people who lived in what is now the United States before the Declaration of Independence. They'll also explore the multiple causes and effects of the Civil War, Industrial Revolution, and Great Depression. Students will learn to use historical documents as evidence as they analyze past events and formulate their own ideas about the Great Awakening, westward expansion, the "roaring twenties," McCarthyism, and the struggle for Civil Rights.

The content is based on the National Council for the Social Studies (NCSS) standards and aligned to state standards.

Michael Buckley

Courses Taught:

Course Name: AP U.S. Government and Politics   Carnegie Units: 0.50

Description: AP U.S. Government and Politics studies the operations and structure of the U.S. government and the behavior of the electorate and politicians. Students will gain the analytic perspective necessary to critically evaluate political data, hypotheses, concepts, opinions, and processes. Along the way, they'll learn how to gather data about political behavior and develop their own theoretical analysis of American politics. They'll also build the skills they need to examine general propositions about government and politics, and to analyze the specific relationships between political, social, and economic institutions. The equivalent of an introductory college-level course, AP U.S. Government and Politics prepares students for the AP Exam and for further study in political science, law, education, business, and history.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: U.S. History

Recommended for qualified AP students

Length: One semester

Course Name: Chemistry   Carnegie Units: 1.00

Description: Chemistry is a comprehensive course that focuses on the understanding of concepts in chemistry and the mastery of critical scientific skills. Students extend their knowledge by applying the scientific method – observation, data collection, analysis, hypothesis and conclusion. They are encouraged to look at chemistry from both a personal and worldly perspective, and analyze the social implications of the topics covered. Topics include the nature of matter; the structure of atoms and molecules; bond formations; the qualitative and quantitative aspects of chemical reactivity; physical and chemical properties of solids, liquids, and gases; states of matter; phase transitions; equilibrium; kinetics; thermodynamics; electrochemistry; nuclear chemistry; and an introduction to organic chemistry.

The content is based on the National Science Teachers Association (NSTA) standards and aligned to state standards.

Prerequisites: Middle school/junior high physical science, and one year of algebra

Recommended Grades: 10, 11, 12

Length: Two semesters

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities --thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
• Email/Message Center
• Teacher moderated online class discussions
• Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
• Telephone
• Written and comprehensive feedback on assignments
• Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Courses Taught:

Course Name: AP Macroeconomics   Carnegie Units: 0.50

Description: AP Macroeconomics students learn why and how the world economy can change from
                     month to month, how to identify trends in our economy, and how to use those trends to
                     develop performance measures and predictors of economic growth or decline. They'll also
                     examine how individuals, institutions, and influences affect people, and how those factors
                     can impact everyone's life through employment rates, government spending, inflation, taxes,
                     and production. The equivalent of a 100-level college-level class, this course prepares
                     students for the AP Exam and for further study in business, political science and history.

                     The content aligns to the scope and sequence specified by the College Board and to
                     widely-used textbooks.

                     Prerequisites: Algebra II (or Math Analysis)

                     Recommended for qualified AP students

                     Length: One semester

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align
                                                          with the subject-specific national standard and key state
                                                          standards as well as Standards for Success, a new set
                                                          of standards built from a collaboration of over 40
                                                          premier institutions of higher learning that specify the
                                                          skills and content knowledge essential to student
                                                          success in colleges and universities. Apex Learning
                                                          can provide detailed correlations to the Montana
                                                          standards.

Methods of Student Contact: Telephone: As Needed

Course Name: AP U.S. History   Carnegie Units: 1.00

Description: AP U.S. History analyzes and explores the economic, political, and social changes in America since Columbus. Students master historical knowledge and critical analysis, build reading, writing, and communication skills, and discover how historical events have contributed to American culture. In the process, they'll learn how decisions and events of the past continue to have profound effects on the world today and how knowledge of the causes behind past events can influence future decisions. By the end of the course, students will be ready to put their factual knowledge to work by weighing evidence and interpreting problems presented by historians. The equivalent of an introductory college-level course, AP U.S. History prepares students for the AP Exam and for further study in history, political science, economics, sociology, and law.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: At least a B-grade in most recent social studies course

Recommended for qualified AP students

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Course Name: AP English Language and Composition   Carnegie Units: 1.00
Description: In AP English Language and Composition, students learn to understand and analyze complex styles of writing by reading works from a variety of authors. They'll explore the richness of language, including syntax, imitation, word choice, and tone. They'll also learn about their own composition style and process, starting with exploration, planning, and writing, and continuing through editing, peer review, rewriting, polishing, and applying what they learn to a breadth of academic, personal, and professional contexts. The equivalent of an introductory college-level survey class, this course prepares students for the AP Exam and for further study in communications, creative writing, journalism, literature, and composition.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: At least a B-grade in most recent English course

Recommended for qualified AP students

Course Name: AP Psychology	Carnegie Units: 0.50

Description: AP Psychology provides an overview of current psychological research methods and theories. Students will explore the therapies used by professional counselors and clinical psychologists and examine the reasons for normal human reactions: how people learn and think, the process of human development and human aggression, altruism, intimacy, and self-reflection. They'll study core psychological concepts, such as the brain and sense functions, and learn to gauge human reactions, gather information, and form meaningful syntheses. Along the way, students will also investigate relevant concepts like study skills and information retention. The equivalent of a 100-level college survey course, AP Psychology prepares students for the AP Exam and for further studies in psychology and life sciences.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Course Name: Spanish I   Carnegie Units: 1.00

Description: Spanish I covers the 5Cs of the ACTFL standard: communication, cultures, connections, comparisons and communities. The instruction is balanced between the thematic and communicative approach to learning language.

Spanish I students will learn to greet people, describe family and friends, talk about hobbies, and communicate about other topics, such as ecology, travel and medicine. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Vocabulary includes school subjects, parts of the body, words to describe people and idiomatic phrases. Language structure and grammar includes the verb system, adjective agreement, formal and informal address, reflexive verbs and past tense. Students will explore words used in different Spanish-speaking regions, and they'll learn about the cultures of Spanish speaking countries and regions within and outside Europe. Web explorations will give students further insight into the culture and people of the Spanish-speaking world, including the United States.

Spanish I is balanced between the thematic and communicative approach to learning language. The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Prerequisites: None

Recommended Grades: 8, 9, 10, 11

Length: Two semesters

Course Name: Spanish II   Carnegie Units: 1.00

Description: Spanish II covers the 5Cs of the ACTFL standard: communication, cultures, connections, comparisons and communities. The instruction is balanced between the thematic and communicative approach to learning language.

Leveraging Spanish I concepts, Spanish II students will learn to communicate more confidently about themselves, their hopes and fears, as well as about topics beyond their own lives—both in formal and informal situations. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Students will expand their vocabulary in cooking, geography and architecture. Language structure and grammar includes verb forms, tenses, moods and uses, impersonal constructions, and reported speech. Students will deepen their knowledge of Spanish speaking regions and cultures by learning about history, literature, culture and contemporary issues. Students also are encouraged to consult materials outside the course, such as Web links; community resources or other media to better understand Spanish-speaking culture and people.

Spanish II is balanced between the thematic and communicative approach to learning language. The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Prerequisites: Spanish I or the equivalent

Courses Taught:

Course Name: Spanish I	Carnegie Units: 1.00

Description: Spanish I covers the 5Cs of the ACTFL standard: communication, cultures, connections, comparisons and communities. The instruction is balanced between the thematic and communicative approach to learning language.

Spanish I students will learn to greet people, describe family and friends, talk about hobbies, and communicate about other topics, such as ecology, travel and medicine. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Vocabulary includes school subjects, parts of the body, words to describe people and idiomatic phrases. Language structure and grammar includes the verb system, adjective agreement, formal and informal address, reflexive verbs and past tense. Students will explore words used in different Spanish-speaking regions, and they'll learn about the cultures of Spanish speaking countries and regions within and outside Europe. Web explorations will give students further insight into the culture and people of the Spanish-speaking world, including the United States.

Spanish I is balanced between the thematic and communicative approach to learning language. The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Prerequisites: None

Recommended Grades: 8, 9, 10, 11

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities --thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
•   Email/Message Center
•   Teacher moderated online class discussions
•   Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
•   Telephone
•   Written and comprehensive feedback on assignments
•   Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
 Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Methods of Student Contact: Telephone: As Needed

Course Name: Spanish II   Carnegie Units: 1.00
Description: Spanish II covers the 5Cs of the ACTFL standard: communication, cultures, connections,

comparisons and communities. The instruction is balanced between the thematic and communicative approach to learning language.

Leveraging Spanish I concepts, Spanish II students will learn to communicate more confidently about themselves, their hopes and fears, as well as about topics beyond their own lives—both in formal and informal situations. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Students will expand their vocabulary in cooking, geography and architecture. Language structure and grammar includes verb forms, tenses, moods and uses, impersonal constructions, and reported speech. Students will deepen their knowledge of Spanish speaking regions and cultures by learning about history, literature, culture and contemporary issues. Students also are encouraged to consult materials outside the course, such as Web links; community resources or other media to better understand Spanish-speaking culture and people.

Spanish II is balanced between the thematic and communicative approach to learning language. The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Prerequisites: Spanish I or the equivalent

Recommended Grades: 9, 10, 11, 12

Courses Taught:

Course Name: Algebra I   Carnegie Units: 1.00

Description: Algebra I is a comprehensive course that provides an in-depth exploration of key algebraic concepts. The course ensures students master critical skills and prepares them to recognize and work with algebraic concepts in real-world situations. Students are challenged to extend their knowledge and understanding by solving open-ended problems and thinking critically. Topics include an Introductory Algebra review; measurement; an introduction to functions; problem solving with functions; graphing; linear equations, and systems of linear equations; an introduction to polynomials; and probability.

To assist students for whom language presents a barrier to learning or who are not reading at grade level, Algebra I includes audio resources in both Spanish and English.

The content is based on the National Council of Teachers of Mathematics (NCTM) standards and is aligned to state standards.

Prerequisites: Introductory or Pre-Algebra

Recommended Grades: 8, 9, 10

Length: Two Semesters

Course Name: Algebra II	Carnegie Units: 1.00

Description: Algebra II is a comprehensive course that builds upon the algebraic concepts covered in Algebra I and prepares students for advanced-level courses. Students are challenged to extend their knowledge and understanding by solving open-ended problems and thinking critically. Topics include conic sections; functions and their graphs; quadratic functions; inverse functions; and advanced polynomial functions. Students are introduced to rational, radical, exponential and logarithmic functions; sequences and series; and data analysis.

The content is based on the National Council of Teachers of Mathematics (NCTM) standards and is aligned to state standards.

Prerequisites: Algebra I

Recommended Grades: 11, 12

Course Name: AP Statistics	Carnegie Units: 1.00

Description: AP Statistics gives students hands-on experience collecting, analyzing, graphing, and interpreting real-world data. They will learn to effectively design and analyze research studies by reviewing and evaluating real research examples taken from daily life. The next time they hear the results from another poll or study, they will know whether the results are valid. As the art of drawing conclusions from imperfect data and the science of real world uncertainties, statistics plays an important role in many fields. The equivalent of an introductory college-level course, AP Statistics prepares students for the AP Exam and for further study in science, sociology, medicine, engineering, political science, geography, and business.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: Algebra II or Math Analysis

Recommended for qualified AP students

Length: Two semesters

Methods of Student Contact: Telephone: As Needed

Course Name: Geometry   Carnegie Units: 1.00

Description: Geometry is a comprehensive course that provides an in-depth exploration of geometric concepts. The course focuses on the mastery of critical skills and the understanding of key mathematical concepts, preparing students for higher-level courses. Students are challenged to extend their knowledge and understanding by solving open-ended problems and thinking critically. Topics include reasoning; proof and the creation of a sound mathematical argument; points, lines, and angles; triangles; quadrilaterals and other polygons; circles; coordinate geometry; and three-dimensional solids. The course concludes with a look at special topics in geometry such as tessellations, fractals and non-Euclidean Geometry.

To assist students for whom language presents a barrier to learning or who are not reading at grade level, Geometry includes audio resources in both Spanish and English.

The content is based on the National Council of Teachers of Mathematics (NCTM) standards and is aligned to state standards.

Course Name: AP English Literature and Composition   Carnegie Units: 1.00

Description: AP English Literature and Composition immerses students in novels, plays, poems, and short stories from various periods. Students will read and write daily, using a variety of multimedia and interactive activities, interpretive writing assignments, and class discussions to assess and improve their skills and knowledge. The course places special emphasis on reading comprehension, structural and critical analysis of written works, literary vocabulary, and recognizing and understanding literary devices. The equivalent of an introductory college-level survey class, this course prepares students for the AP Exam and for further study in creative writing, communications, journalism, literature, and composition.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: At least a B-grade in most recent English course

Recommended for qualified AP students

- Written and comprehensive feedback on assignments
- Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

                                                             Folio/License Number: 727701

Courses Taught:

Course Name: AP Calculus AB   Carnegie Units: 1.00
Description: In AP Calculus AB, students learn to understand change geometrically and visually (by studying graphs of curves), analytically (by studying and working with mathematical formulas), numerically (by seeing patterns in sets of numbers), and verbally. Instead of simply getting the right answer, students learn to evaluate the soundness of proposed solutions and to apply mathematical reasoning to real-world models. Calculus helps scientists, engineers, and financial analysts understand the complex relationships behind real-world phenomena. The equivalent of an introductory college-level calculus course, AP Calculus AB prepares students for the AP Exam and further studies in science, engineering, and mathematics.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: Algebra II, Geometry, Pre-Calculus with Trigonometry

Recommended for qualified AP students

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities - -thoroughly review every activity within each online course. At the end of each semester,

our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
•   Email/Message Center
•   Teacher moderated online class discussions
•   Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
•   Telephone
•   Written and comprehensive feedback on assignments
•   Announcements

Course Name: Geometry   Carnegie Units: 1.00

Description: Geometry is a comprehensive course that provides an in-depth exploration of geometric concepts. The course focuses on the mastery of critical skills and the understanding of key mathematical concepts, preparing students for higher-level courses. Students are challenged to extend their knowledge and understanding by solving open-ended problems and thinking critically. Topics include reasoning; proof and the creation of a sound mathematical argument; points, lines, and angles; triangles; quadrilaterals and other polygons; circles; coordinate geometry; and three-dimensional solids. The course concludes with a look at special topics in geometry such as tessellations, fractals and non-Euclidean Geometry.

To assist students for whom language presents a barrier to learning or who are not reading at grade level, Geometry includes audio resources in both Spanish and English.

The content is based on the National Council of Teachers of Mathematics (NCTM) standards and is aligned to state standards.

Prerequisites: Introductory or Pre-Algebra

Recommended Grades: 10, 11

Jann Longman   Current License From: WA
Folio/License Number: 228755E

Courses Taught:

Course Name: AP Psychology   Carnegie Units: 0.50

Description: AP Psychology provides an overview of current psychological research methods and theories. Students will explore the therapies used by professional counselors and clinical psychologists and examine the reasons for normal human reactions: how people learn and think, the process of human development and human aggression, altruism, intimacy, and self-reflection. They'll study core psychological concepts, such as the brain and sense functions, and learn to gauge human reactions, gather information, and form meaningful syntheses. Along the way, students will also investigate relevant concepts like study skills and information retention. The equivalent of a 100-level college survey course, AP Psychology prepares students for the AP Exam and for further studies in psychology and life sciences.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: Biology

Recommended for qualified AP students

Dave May

Courses Taught:

Course Name: AP U.S. Government and Politics   Carnegie Units: 0.50

Description: AP U.S. Government and Politics studies the operations and structure of the U.S. government and the behavior of the electorate and politicians. Students will gain the analytic perspective necessary to critically evaluate political data, hypotheses, concepts, opinions, and processes. Along the way, they'll learn how to gather data about political behavior and develop their own theoretical analysis of American politics. They'll also build the skills they need to examine general propositions about government and politics, and to analyze the specific relationships between political, social, and economic institutions. The equivalent of an introductory college-level course, AP U.S. Government and Politics prepares students for the AP Exam and for further study in political science, law, education, business, and history.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: U.S. History

Recommended for qualified AP students

Courses Taught:
_____

Course Name: Biology   Carnegie Units: 1.00
Description: Biology is a comprehensive course that allows students to master scientific skills, develop an understanding of key concepts and models, and apply the scientific method to biological topics. Through the development of their own scientific explanations, students extend their knowledge and make sense of the world. Students are encouraged to look at biology from both a personal and worldly perspective, and analyze the social implications of the topics covered. The course begins with the study of cell and molecular biology, and covers experimental design; chemistry and the biochemical basis of life; cell structure and function; basic metabolism; and genetics. Building on this foundation is an exploration into evolution, biodiversity, organismal biology, and ecology. As part of the study of vertebrates, the structure and function of major organ systems and biological processes in humans are introduced.

The content is based on the National Science Teachers Association (NSTA) standards and aligned to state standards.

Prerequisites: None

Recommended Grades: 9, 10, 11, 12

Course Name: Earth Science   Carnegie Units: 1.00

Description: Earth Science is a comprehensive course that explores the Earth's composition, structure, processes, and history; its atmosphere, fresh water, and oceans; and its environment in space. Students are encouraged to look at earth science from both a personal and worldly perspective, and analyze the social implications of the topics covered. Laboratory experiments introduce students to different lab techniques while building their skills in critical thinking, inquiry and observation. Topics include an exploration of the major cycles that affect every aspect of life including weather, climate, and air movement, tectonics, volcanic eruptions, rocks, minerals, geologic history, the earth's environment, sustainability and energy resources.

The content is based on the National Science Teachers Association (NSTA) standards and aligned to state standards.

Course Name: AP Microeconomics | Carnegie Units: 0.50

Description: AP Microeconomics studies the behavior of individuals and businesses as they exchange goods and services in the marketplace. Students will learn why the same product costs different amounts at different stores, in different cities, at different times. They'll also learn to spot patterns in economic behavior and how to use those patterns to explain buyer and seller behavior under various conditions. Microeconomics studies the economic way of thinking, understanding the nature and function of markets, the role of scarcity and competition, the influence of factors such as interest rates on business decisions, and the role of government in promoting a healthy economy. The equivalent of a 100-level college course, AP Microeconomics prepares students for the AP Exam and for further study in business, history, and political science.

 Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Course Name: AP Calculus AB   Carnegie Units: 1.00

Description: In AP Calculus AB, students learn to understand change geometrically and visually (by studying graphs of curves), analytically (by studying and working with mathematical formulas), numerically (by seeing patterns in sets of numbers), and verbally. Instead of simply getting the right answer, students learn to evaluate the soundness of proposed solutions and to apply mathematical reasoning to real-world models. Calculus helps scientists, engineers, and financial analysts understand the complex relationships behind real-world phenomena. The equivalent of an introductory college-level calculus course, AP Calculus AB prepares students for the AP Exam and further studies in science, engineering, and mathematics.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: Algebra II, Geometry, Pre-Calculus with Trigonometry

Recommended for qualified AP students

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities - -thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
•   Email/Message Center
•   Teacher moderated online class discussions
•   Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
•   Telephone
•   Written and comprehensive feedback on assignments
•   Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
 Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Courses Taught:

Course Name: AP English Language and Composition   Carnegie Units: 1.00

Description: In AP English Language and Composition, students learn to understand and analyze complex styles of writing by reading works from a variety of authors. They'll explore the richness of language, including syntax, imitation, word choice, and tone. They'll also learn about their own composition style and process, starting with exploration, planning, and writing, and continuing through editing, peer review, rewriting, polishing, and applying what they learn to a breadth of academic, personal, and professional contexts. The equivalent of an introductory college-level survey class, this course prepares students for the AP Exam and for further study in communications, creative writing, journalism, literature, and composition.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: At least a B-grade in most recent English course

Recommended for qualified AP students

Course Name: AP Psychology　　　　　　　　　　　　Carnegie Units: 0.50

Description:　　AP Psychology provides an overview of current psychological research methods and theories. Students will explore the therapies used by professional counselors and clinical psychologists and examine the reasons for normal human reactions: how people learn and think, the process of human development and human aggression, altruism, intimacy, and self-reflection. They'll study core psychological concepts, such as the brain and sense functions, and learn to gauge human reactions, gather information, and form meaningful syntheses. Along the way, students will also investigate relevant concepts like study skills and information retention. The equivalent of a 100-level college survey course, AP Psychology prepares students for the AP Exam and for further studies in psychology and life sciences.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: Biology

Course Name: AP Biology	Carnegie Units: 1.00

Description: In AP Biology, students build the conceptual framework necessary to understand science as a process. The course is divided into three sections with correlating laboratory exercises: molecules and cells; heredity and evolution; and organisms and populations. Students will also explore evolution, energy transfer, continuity and change, the relationship of structure to function, regulation, interdependence in nature, and the balance of science, technology, and nature. The equivalent of an introductory college-level biology course, AP Biology prepares students for the AP Exam and for further study in health sciences.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Course Name: Biology   Carnegie Units: 1.00

Description: Biology is a comprehensive course that allows students to master scientific skills, develop an understanding of key concepts and models, and apply the scientific method to biological topics. Through the development of their own scientific explanations, students extend their knowledge and make sense of the world. Students are encouraged to look at biology from both a personal and worldly perspective, and analyze the social implications of the topics covered. The course begins with the study of cell and molecular biology, and covers experimental design; chemistry and the biochemical basis of life; cell structure and function; basic metabolism; and genetics. Building on this foundation is an exploration into evolution, biodiversity, organismal biology, and ecology. As part of the study of vertebrates, the structure and function of major organ systems and biological processes in humans are introduced.

The content is based on the National Science Teachers Association (NSTA) standards and aligned to state standards.

Course Name: Skills for Health   Carnegie Units: 0.50

Description: Skills for Health is a comprehensive skills-based health education course designed for general education students in grades 9 through 12. Skills for Health helps students develop knowledge, attitudes, and essential skills in (1) mental and emotional health; (2) nutrition; (3) lifelong physical activity; (4) substance use and abuse; (5) injury prevention and safety; (6)

growth and development; and (7) personal health, environmental conservation, and community health resources.

Through real-life simulations that engage and motivate, students apply skills such as accessing valid health information, self-management, analyzing internal and external influences, interpersonal communication, decision-making, goal setting, and advocacy. There are multiple opportunities for practice and assessment integrated throughout. Students who complete Skills for Health build the skills they need to protect, enhance, and promote their own health and the health of others.

The content is based on the National Science Teachers Association (NSTA) standards and aligned to state standards.

Course Name: Physical Education   Carnegie Units: 0.50

Description: Physical Education combines the best of online instruction with actual student participation in weekly cardiovascular, aerobic, and muscle toning activities. The course promotes a keen understanding of the value of physical fitness and aims to motivate students to participate in physical activities throughout their lives.

Specific areas of study include: Cardiovascular exercise and care, safe exercising, building muscle strength and endurance, injury prevention, fitness skills and FITT benchmarks, goal setting, nutrition and diet (vitamins and minerals, food labels, evaluation product claims), and stress management. The course requires routine participation in adult-supervised physical activities. Successful completion of this course will require parent/legal guardian sign-off on student-selected physical activities and on weekly participation reports to verify the student is meeting his or her requirements and responsibilities.

Physical Education is aligned to national and state standards and the Presidential Council on Physical Fitness and Sports.

Course Name: Spanish I   Carnegie Units: 1.00

Description: Spanish I covers the 5Cs of the ACTFL standard: communication, cultures, connections, comparisons and communities. The instruction is balanced between the thematic and communicative approach to learning language.

Spanish I students will learn to greet people, describe family and friends, talk about hobbies, and communicate about other topics, such as ecology, travel and medicine. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Vocabulary includes school subjects, parts of the body, words to describe people and idiomatic phrases. Language structure and grammar includes the verb system, adjective agreement, formal and informal address, reflexive verbs and past tense. Students will explore words used in different Spanish-speaking regions, and they'll learn about the cultures of Spanish speaking countries and regions within and outside Europe. Web explorations will give students further insight into the culture and people of the Spanish-speaking world, including the United States.

Spanish I is balanced between the thematic and communicative approach to learning language. The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Course Name: Spanish II   Carnegie Units: 1.00
Description: Spanish II covers the 5Cs of the ACTFL standard: communication, cultures, connections, comparisons and communities. The instruction is balanced between the thematic and communicative approach to learning language.

Leveraging Spanish I concepts, Spanish II students will learn to communicate more confidently about themselves, their hopes and fears, as well as about topics beyond their own lives—both in formal and informal situations. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Students will

expand their vocabulary in cooking, geography and architecture. Language structure and grammar includes verb forms, tenses, moods and uses, impersonal constructions, and reported speech. Students will deepen their knowledge of Spanish speaking regions and cultures by learning about history, literature, culture and contemporary issues. Students also are encouraged to consult materials outside the course, such as Web links; community resources or other media to better understand Spanish-speaking culture and people.

Spanish II is balanced between the thematic and communicative approach to learning language. The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Prerequisites: Spanish I or the equivalent

Recommended Grades: 9, 10, 11, 12

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities --thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
•   Email/Message Center
•   Teacher moderated online class discussions
•   Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
•   Telephone
•   Written and comprehensive feedback on assignments
•   Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
 Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents

to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Courses Taught:

Course Name: AP Biology   Carnegie Units: 1.00
Description: In AP Biology, students build the conceptual framework necessary to understand science as a process. The course is divided into three sections with correlating laboratory exercises: molecules and cells; heredity and evolution; and organisms and populations. Students will also explore evolution, energy transfer, continuity and change, the relationship of structure to function, regulation, interdependence in nature, and the balance of science, technology, and nature. The equivalent of an introductory college-level biology course, AP Biology prepares students for the AP Exam and for further study in health sciences.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: Biology and Chemistry

Recommended for qualified AP students

Length: Two semesters

Course Name: Biology   Carnegie Units: 1.00

Description: Biology is a comprehensive course that allows students to master scientific skills, develop an understanding of key concepts and models, and apply the scientific method to biological topics. Through the development of their own scientific explanations, students extend their knowledge and make sense of the world. Students are encouraged to look at biology from both a personal and worldly perspective, and analyze the social implications of the topics covered. The course begins with the study of cell and molecular biology, and covers experimental design; chemistry and the biochemical basis of life; cell structure and function; basic metabolism; and genetics. Building on this foundation is an exploration into evolution, biodiversity, organismal biology, and ecology. As part of the study of vertebrates, the structure and function of major organ systems and biological processes in humans are introduced.

The content is based on the National Science Teachers Association (NSTA) standards and aligned to state standards.

Prerequisites: None

Courses Taught:

Course Name: AP Calculus AB   Carnegie Units: 1.00
Description: In AP Calculus AB, students learn to understand change geometrically and visually (by studying graphs of curves), analytically (by studying and working with mathematical formulas), numerically (by seeing patterns in sets of numbers), and verbally. Instead of simply getting the right answer, students learn to evaluate the soundness of proposed solutions and to apply mathematical reasoning to real-world models. Calculus helps scientists, engineers, and financial analysts understand the complex relationships behind real-world phenomena. The equivalent of an introductory college-level calculus course, AP Calculus AB prepares students for the AP Exam and further studies in science, engineering, and mathematics.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: Algebra II, Geometry, Pre-Calculus with Trigonometry

Recommended for qualified AP students

Course Name: Geometry   Carnegie Units: 1.00

Description: Geometry is a comprehensive course that provides an in-depth exploration of geometric concepts. The course focuses on the mastery of critical skills and the understanding of key mathematical concepts, preparing students for higher-level courses. Students are challenged to extend their knowledge and understanding by solving open-ended problems and thinking critically. Topics include reasoning; proof and the creation of a sound mathematical argument; points, lines, and angles; triangles; quadrilaterals and other polygons; circles; coordinate geometry; and three-dimensional solids. The course concludes with a look at special topics in geometry such as tessellations, fractals and non-Euclidean Geometry.

To assist students for whom language presents a barrier to learning or who are not reading

at grade level, Geometry includes audio resources in both Spanish and English.

The content is based on the National Council of Teachers of Mathematics (NCTM) standards and is aligned to state standards.

Prerequisites: Introductory or Pre-Algebra

Recommended Grades: 10, 11

Length: Two semesters

Course Name: AP Microeconomics   Carnegie Units: 0.50

Description: AP Microeconomics studies the behavior of individuals and businesses as they exchange goods and services in the marketplace. Students will learn why the same product costs different amounts at different stores, in different cities, at different times. They'll also learn to spot patterns in economic behavior and how to use those patterns to explain buyer and seller behavior under various conditions. Microeconomics studies the economic way of thinking, understanding the nature and function of markets, the role of scarcity and competition, the influence of factors such as interest rates on business decisions, and the role of government in promoting a healthy economy. The equivalent of a 100-level college course, AP Microeconomics prepares students for the AP Exam and for further study in business, history, and political science.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Elizabeth White

Current License From: NY
Folio/License Number: 108665308

Courses Taught:

Course Name: French I	Carnegie Units: 1.00

Description: Balanced between the thematic and communicative approach to learning language, French I teaches students to greet people, describe family and friends, talk about hobbies, and communicate about other topics, such as sports, travel and medicine. Each lesson presents vocabulary, grammar and cultural items in context, followed by explanations and exercises. Vocabulary includes school subjects, parts of the body, words to describe people, and idiomatic phrases. Language structure and grammar instruction includes the verb system, adjective agreement, formal and informal address, reflexive verbs and past tense. Students also gain an understanding of the cultures of French-speaking countries and regions within and outside Europe as well as insight into Francophone culture and people.

The content is based on the American Council on the Teaching of Foreign Languages (ACTFL) standards.

Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Methods of Student Contact: Telephone: As Needed

Course Name: AP English Literature and Composition   Carnegie Units: 1.00

Description: AP English Literature and Composition immerses students in novels, plays, poems, and short stories from various periods. Students will read and write daily, using a variety of multimedia and interactive activities, interpretive writing assignments, and class discussions to assess and improve their skills and knowledge. The course places special emphasis on reading comprehension, structural and critical analysis of written works, literary vocabulary, and recognizing and understanding literary devices. The equivalent of an introductory college-level survey class, this course prepares students for the AP Exam and for further study in creative writing, communications, journalism, literature, and composition.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: At least a B-grade in most recent English course

Recommended for qualified AP students

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Apex Learning can provide detailed correlations to the Montana standards.

Course Evaluation: Apex Learning courses are dynamic not static. Before the course is published for the first time, Apex Learning subject matter experts—the leading online education authorities --thoroughly review every activity within each online course. At the end of each semester, our online courses are updated based on teacher and student feedback, scrutinizing student results of our own diagnostic tests, a constant monitoring of standards, and to be attuned to evolving pedagogical trends.

Delivery Model: Asynchronous

Student Interaction Monitored and Assessed: Apex Learning's online instructors are certified high school teachers and understand how to work with secondary school students. They are all experienced in teaching in their subject area, so they provide meaningful teaching, feedback and academic guidance to students. They are also skilled at working within a distance-learning environment.

With Apex Learning Online Courses, online instructors use a variety of tools to communicate with students:
• Email/Message Center
• Teacher moderated online class discussions
• Real time office through a synchronous chat/whiteboard environment, by email and/or by phone
• Telephone
• Written and comprehensive feedback on assignments
• Announcements

Targeted response times:
One school day for email/Message Center communications
Three school days for teacher scored work
Apex Learning's Instruction Department closely monitors and evaluates the quality and promptness of teacher feedback to ensure the above standards are met.

Feedback to students on homework, tests and quizzes is provided using various methods. Computer-scored assignments are those in which feedback is immediately available to students upon completion of the assignment. Students simply click a button to view their results. Alternatively, teacher-scored assignments provided in Online Courses use a custom document exchange feature, allowing students to submit hand-written homework assignments (necessary in many math and science courses) as well as digital documents to their online instructor. Hand-written assignments are automatically converted into digital documents, allowing for easy instructor review, grading, and personalized feedback. Results from computer-scored assignments and teacher-graded assignments are available to Online Course students via the Activity Score Reports that identify scores earned for each assignment.

Course Name: Critical Reading and Effective Writing   Carnegie Units: 1.00

Description: Critical Reading and Effective Writing offers a balanced curriculum that develops both academic and life skills. Concepts are presented in creative and lively ways that reinforce learning goals and engage students. Literary selections include short fiction and poetry from around the globe, Shakespearean and modern drama works, as well as two contemporary novels. Non-fiction selections feature historical correspondence, diaries, logs, and famous courtroom arguments. Life reading skills target forms, applications, and work-related communication. Throughout both semesters students build active reading strategies as they question, predict, clarify, and evaluate events and ideas presented in text.

The writing program builds confidence in young writers by targeting control of organization, effective sentences, and word choice. Students use the writing process and receive timely, detailed feedback on all written work. Grammar review and vocabulary development are included in every unit. Web explorations support media literacy and encourage students to be discerning consumers of print and non-print information.

The content is based on the National Council of Teachers of English (NCTE) standards and aligned to state standards.

Prerequisites: 9th Grade English

Recommended Grades: 10, 11, 12

Length: Two semesters

Dave Wright

Current License From: WA
Folio/License Number: 279688F

Courses Taught:

Course Name: AP Calculus AB   Carnegie Units: 1.00
Description: In AP Calculus AB, students learn to understand change geometrically and visually (by studying graphs of curves), analytically (by studying and working with mathematical formulas), numerically (by seeing patterns in sets of numbers), and verbally. Instead of simply getting the right answer, students learn to evaluate the soundness of proposed solutions and to apply mathematical reasoning to real-world models. Calculus helps scientists, engineers, and financial analysts understand the complex relationships behind real-world phenomena. The equivalent of an introductory college-level calculus course, AP Calculus AB prepares students for the AP Exam and further studies in science, engineering, and mathematics.

The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Prerequisites: Algebra II, Geometry, Pre-Calculus with Trigonometry

Recommended for qualified AP students

Length: Two semesters

Curriculum Alignment?   Yes   Alignment Process: Apex Learning Online Courses are developed to align with the subject-specific national standard and key state standards as well as Standards for Success, a new set of standards built from a collaboration of over 40 premier institutions of higher learning that specify the skills and content knowledge essential to student success in colleges and universities. Courses Taught:

Course Name: AIMS PREP MATHEMATICS	Carnegie Units: 0.50

Description: AIMS Prep Mathematics is a course designed to refresh mathematical skills learned in Algebra and Geometry. This course will aid students in reviewing the material that will be tested on the Arizona Instrument to Measure the Standards (AIMS). The course will also offer test taking strategies that students can use to have a more successful test taking experience. Calculators are strongly discouraged from being used in this course.

Curriculum Alignment?   Yes   Alignment Process: All courses are aligned to Arizona State Standards. These standards are aligned to National Standards. Indirectly Blueprint Education courses are then aligned to Montana State standards

Course Evaluation: All courses are developed by certified teachers who have 24 credit hours or more of coursework in their content area. The Director of Curriculum works with the certified teacher along with way. A timeline is established for completion of course development and progress checks along the way. Feedback is given by the Director of Curriculum as the teacher develops the course; feedback given after the first lesson, after first half of lessons, after midterm, after second half of lessons, and after course alignment to standards.

Delivery Model: Asynchronous, Print

Student Interaction Monitored and Assessed: All lessons have some type of assessment, such as a writing assignment, objective question quiz, or project. All lesson grades count for 40% of the overall course grade. Every course has a proctored midterm exam and a final exam. Students must pass these exams with a 60%.

Course Name: ALGEBRA 1	Carnegie Units: 0.50

Description: Algebra 1 is the first semester of the first year of algebra in the high school curriculum. Algebra 1 will introduce the topics of patterns in algebra, operations in algebra, solving equations, proportional reasoning and statistics, linear functions, inequalities, absolute value, and systems of equations and inequalities. A foundation

in basic math (i.e. arithmetic and Pre algebra) is essential for success.

Curriculum Alignment?   Yes   Alignment Process: All courses are aligned to Arizona State Standards. These standards are aligned to National Standards. Indirectly Blueprint Education courses are then aligned to Montana State standards.

Course Evaluation: All courses are developed by certified teachers who have 24 credit hours or more of coursework in their content area.                      graphing linear, quadratic, cubic, and
                     trigonometric function, using of radians
                     and degrees to measure angles, finding
                     and evaluate sine, cosine, and tangent as
                     well as their inverse functions, graphing
                     all trigonometric functions as well as the
                     inverse functions, using trigonometric
                     identities to solve trigonometric
                     problems, using and apply the Law of
                     Sines and Cosines, and applying vectors
                     to solve trigonometric problems.

Curriculum Alignment?   Yes   Alignment Process: All courses are aligned to Arizona State Standards.
                                                           These standards are aligned to National Standards.
                                                           Indirectly Blueprint Education courses are then aligned
                                                           to Montana State standards.

Course Evaluation: All courses are developed by certified teachers who have 24 credit hours or more of
                       coursework in their content area. The Director of Curriculum works with the certified
                       teacher along with way. A timeline is established for completion of course development and
                       progress checks along the way. Feedback is given by the Director of Curriculum as the
                       teacher develops the course; feedback given after the first lesson, after first half of lessons,
                       after midterm, after second half of lessons, and after course alignment to standards.

Delivery Model: Asynchronous, Print

Student Interaction Monitored and Assessed: All lessons have some type of assessment, such as a writing
                                                  assignment, objective question quiz, or project. All lesson
                                                  grades count for 40% of the overall course grade. Every course
                                                  has a proctored midterm exam and a final exam. Students must
                                                  pass these exams with a 60%.

Course Name: SOPHOMORE ENGLISH 2 BASIC   Carnegie Units: 0.50

Description: This course is designed for students who desire to become successful with improving their reading, writing and grammar skills in order to meet English and literature competency requirements for graduation. The focus of English is writing paragraphs with purpose, writing essays, practical writing, and writing in school. The scope and sequence of literature enhance reading comprehension, literary skills, vocabulary, process writing, critical thinking and viewing. There are numerous writing and essay assignments in this course. Writing assignments are assessed using the Six-Trait Writing Rubric.

Curriculum Alignment?   Yes   Alignment Process: All courses are aligned to Arizona State Standards. These standards are aligned to National Standards. Indirectly Blueprint Education courses are then aligned to Montana State standards.

Course Evaluation: All courses are developed by certified teachers who have 24 credit hours or more of coursework in their content area. The Director of Curriculum works with the certified teacher along with way. A timeline is established for completion of course development and progress checks along the way. Feedback is given by the Director of Curriculum as the teacher develops the course; feedback given after the first lesson, after first half of lessons, after midterm, after second half of lessons, and after course alignment to standards.

Delivery Model: Asynchronous, Print, Internet

Student Interaction Monitored and Assessed: All lessons have some type of assessment, such as a writing assignment, objective question quiz, or project. All lesson grades count for 40% of the overall course grade. Every course has a proctored midterm exam and a final exam. Students must pass these exams with a 60%.

Course Name: SPEECH   Carnegie Units: 0.50

Description: Understanding how to effectively communicate is important for everyday life. By thoroughly evaluating various speeches and practicing a range of communication strategies, you will develop invaluable skills for conducting your own oral presentations. You are expected to video tape yourself giving speeches; please be prepared. Major topics studied in this course include: delivering an impromptu speech, oral interpretations of literary and original works, conducting interviews, evaluation of informal and formal presentations, analyzing and evaluating visual media and producing a multimedia presentation.

Curriculum Alignment?   Yes   Alignment Process: All courses are aligned to Arizona State Standards. These standards are aligned to National Standards. Indirectly Blueprint Education courses are then aligned to Montana State standards.

Course Evaluation: All courses are developed by certified teachers who have 24 credit hours or more of coursework in their content area. Course Name: CHEMISTRY 1	Carnegie Units: 0.50

Description: This course is designed to provide students with opportunities to develop and use important chemistry concepts and skills, with which to understand the chemistry behind real-life phenomenon. Some topics that will be covered include: chemical and physical properties, formulas and equations, ions and solutions, the periodic table, bonding, gas laws, acid vs. base chemistry, kinetic molecular theory, and green chemistry. This is a lab science credit.

Curriculum Alignment?   Yes   Alignment Process: All courses are aligned to Arizona State Standards. These standards are aligned to National Standards. Indirectly Blueprint Education courses are then aligned to Montana State standards.

Course Name: EARTH SCIENCE 1	Carnegie Units: 0.50

Description: This laboratory course investigates the physical world, and enables the student to learn through discovery. The major instructional areas are the Earth and universe: Earth and its motions, materials of the Earth's surface, atomic structure, history of the Earth, Earth's water, Earth's atmosphere, forces that sculpt

the Earth's surface, the limits of the
Earth, and the solar system. Students
use the scientific method in scientific
investigations, read maps, use the periodic
table, and understand how minerals are
classified. This is a lab science credit.

Curriculum Alignment?　　Yes　　Alignment Process:　　All courses are aligned to Arizona State Standards.
These standards are aligned to National Standards.
Indirectly Blueprint Education courses are then aligned
to Montana State standards.

Course Evaluation:　　All courses are developed by certified teachers who have 24 credit hours or more of
coursework in their content area. The Director of Curriculum works with the certified
teacher along with way. A timeline is established for completion of course development and
progress checks along the way. Feedback is given by the Director of Curriculum as the

Course Name: EARTH SCIENCE 2　　　　　　　　　　　　　　　　Carnegie Units: 0.50

Description:　　Earth Science 2 helps students appreciate
our planet Earth, and understand forces
affecting it. Students study the history of
the Earth, pollution, ocean properties,
currents, waves, tides, weather and climate,
the solar system, science, and technology.
Students use the scientific method to
complete investigations required for the
laboratory activities. They will explain how
North America and the Grand Canyon
were formed. This is a lab science credit.

Curriculum Alignment?　　Yes　　Alignment Process:　　All courses are aligned to Arizona State Standards.
These standards are aligned to National Standards.
Indirectly Blueprint Education courses are then aligned

Course Name: ENVIRONMENTAL SCIENCE　　　　　　　　　　　Carnegie Units: 0.50

Description:　　This course is recommended for juniors
and seniors as a science elective. It stresses
that balance in our ecosystem is dependent
upon balance between various forces:

nutrient gains and losses, energy inflow and outflow, and births and deaths. It covers soil, waste disposal, and use of land and energy resources. It discusses types of pollution and their solutions, leading to an understanding of the basic principles of natural selection, adaptation, and nutrient cycles. The course enables the student to see connections between personal attitudes/lifestyle and various existing environmental problems, thus establishing the motivation for change.

Curriculum Alignment?   Yes   Alignment Process: All courses are aligned to Arizona State Standards. These standards are aligned to National Standards. Indirectly Blueprint Education courses are then aligned to Montana State standards.

Course Name: AMERICAN/ARIZONA GOVERNMENT	Carnegie Units: 0.50

Description: American/Arizona Government is a study of democracy and the American governmental systems, the processes, and contributions to the American people. The duties of elected officials, basic principles of the American democratic government, and political behavior are covered. The executive, legislative and judicial branches of government and their functions, civil rights and civil liberties, and comparative systems are studied. Federal, state, and local government actions, and the rights and roles of American people are related. The political history of Arizona, its three governmental branches, local governmental entities and citizenship responsibilities round out this course curriculum.

Curriculum Alignment?   Yes   Alignment Process: All courses are aligned to Arizona State Standards. These standards are aligned to National Standards. Indirectly Blueprint Education courses are then aligned to Montana State standards.

Course Evaluation: All courses are developed by certified teachers who have 24 credit hours or more of coursework in their content area. The Director of Curriculum works with the certified teacher along with way. A timeline is established for completion of course development and progress checks along the way. Feedback is given by the Director of Curriculum as the teacher develops the course; feedback given after the first lesson, after first half of lessons, after midterm, after second half of lessons, and after course alignment to standards.

Delivery Model: Asynchronous, Print, Internet

Course Name: WORLD GEOGRAPHY 1   Carnegie Units: 0.50

Description: This course acquaints the student with the physical and cultural features of geographical regions throughout the world, with emphasis on the cultural contributions of various areas, current developments, and man's interrelationship with the environment. It covers five major topics of study: Looking at the World, The United States and Canada, Latin America, Europe, Russia, and the Eurasian Republics. With an emphasis on individual skill-building for geographic knowledge, students use maps and other geographic knowledge to acquire and process geographic information

and develop a spatial view of the world. Students investigate how people live on the earth and how they use the earth to satisfy their basic needs, as well as critically view geography of the past in order to make logical decisions concerning the geography of the future.

Curriculum Alignment?   Yes   Alignment Process: All courses are aligned to Arizona State Standards. These standards are aligned to National Standards. Indirectly Blueprint Education courses are then aligned to Montana State standards.

Course Name: Arabic, Level 1	Carnegie Units: 1.00

Description: Rosetta Stone follows a natural progression, beginning with lessons that assume the student has never been exposed to Arabic. Rosetta Stone presents a set of four images that the student must correctly match to a spoken or written phrase or sentence in Arabic. Introductory vocabulary becomes associated with familiar objects, actions and ideas. Words build to phrases, based upon imagery, with written and verbal clues presented. The lessons build upon each other, moving the student to deeper levels of literacy and comprehension. Students learn the basics required to achieve conversational proficiency in Arabic. Topics cover the building blocks of language acquisition, ranging from singular nouns, affirmative and negative verb forms, to family relationships, numbers up to 100 and many other core language concepts. Each lesson builds systematically, using clear visual clues and material that the student has previously mastered. The language is introduced in a natural, easily recognized context which includes progressively complex vocabulary and grammatical skills, such as past, present and future verb tenses. Students are constantly exposed to the structure of Arabic and acquire the proper grammar and usage modeled for them in Rosetta Stone.
A table of contents is available upon request.

Curriculum Alignment?   No   Alignment Process: Rosetta Stone correlates with many but not all of the Montana World Language Standards.

Course Evaluation: Rosetta Stone allows educators to review their students' progress via powerful reporting capabilities, which highlight areas in which individuals may be experiencing difficulty. This offers the opportunity to provide help when it's needed, while not delaying other students who may be achieving comprehension at a faster rate.
Information about time on task, time on test and scores for both practice and test exercises are stored for each student. Students may repeat any activity ensuring additional mastery and review each time.

Delivery Model: Asynchronous, Internet, Other (Students work independently on internet based activities that focus on rea

Student Interaction Monitored and Assessed: Each school and instructor can monitor their own students progress through Rosetta Stone. Access to all the reporting and setup features is internet based allowing easy access from most internet connected computer.

Methods of Student Contact: Other (School/Teacher checks progress): As Needed

Course Name: Arabic, Level 2	Carnegie Units: 1.00

Description: Still following a natural progression, Rosetta Stone, Level 2 Arabic builds language skills to include more complex grammar and subject matter. Conversation skills such as the ability to greet others, ask questions, use passive voice and use subjunctive and subordinate clauses are important additions to literacy. The ability to discuss travel, transportation and transactions as well as the weather and appropriate clothing, further enhances students' ability to interact. Level 2 further introduces shopping activities and terminology, imperatives, sickness and health, and the five senses. Level 2 also introduces idiom, humor and sarcasm. Every curriculum lesson has activities that develop reading, writing, listening and speaking. Upon completion of this level, the student should have achieved advanced literacy. A table of contents is available upon request.

Course Name: Dutch, Level 1   **Carnegie Units: 1.00**

Description: Rosetta Stone follows a natural progression, beginning with lessons that assume the student has never been exposed to Dutch. Rosetta Stone presents a set of four images that the student must correctly match to a spoken or written phrase or sentence in Dutch. Introductory vocabulary becomes associated with familiar objects, actions and ideas. Words build to phrases, based upon imagery, with written and verbal clues presented. The lessons build upon each other, moving the student to deeper levels of literacy and comprehension. Students learn the basics required to achieve conversational proficiency in Dutch. Topics cover the building blocks of language acquisition, ranging from singular nouns, affirmative and negative verb forms, to family relationships, numbers up to 100 and many other core language concepts. Each lesson builds systematically, using clear visual clues and material that the student has previously mastered. The language is introduced in a natural, easily recognized context which includes progressively complex vocabulary and grammatical skills, such as past, present and future verb tenses. Students are constantly exposed to the structure of Dutch and acquire the proper grammar and usage modeled for them in Rosetta Stone.

A table of contents is available upon request.

Curriculum Alignment?   No   Alignment Process: Rosetta Stone correlates with many but not all of the Montana World Language Standards.

Course Evaluation: Rosetta Stone allows educators to review their students' progress via powerful reporting capabilities, which highlight areas in which individuals may be experiencing difficulty. This offers the opportunity to provide help when it's needed, while not delaying other students who may be achieving comprehension at a faster rate.
Information about time on task, time on test and scores for both practice and test exercises are stored for each student. Students may repeat any activity ensuring additional mastery and review each time.

Delivery Model: Asynchronous, Internet, Other (Students work independently on internet based activities that focus on re

Student Interaction Monitored and Assessed: Each school and instructor can monitor their own students progress through Rosetta Stone. Access to all the reporting and setup features is internet based allowing easy access from most internet connected computer.

Methods of Student Contact: Other (School/Teacher checks progress): As Needed

---

Course Name: Dutch, Level 2   Carnegie Units: 1.00

Description: Still following a natural progression, Rosetta Stone, Level 2 Dutch builds language skills to include more complex grammar and subject matter. Conversation skills such as the ability to greet others, ask questions, use passive voice and use subjunctive and subordinate clauses are important additions to literacy. The ability to discuss travel, transportation and transactions as well as the weather and appropriate clothing, further enhances students' ability to interact. Level 2 further introduces shopping activities and terminology, imperatives, sickness and health, and the five senses. Level 2 also introduces idiom, humor and sarcasm. Every curriculum lesson has activities that develop reading, writing, listening and speaking. Upon completion of this level, the student should have achieved advanced literacy. A table of contents is available upon request.

The language is introduced in a natural, easily recognized context which includes progressively complex vocabulary and grammatical skills, such as past, present and future verb tenses. Students are constantly exposed to the structure of Polish and acquire the proper grammar and usage modeled for them in Rosetta Stone.

A table of contents is available upon request.

Curriculum Alignment?   No   Alignment Process: Rosetta Stone correlates with many but not all of the Montana World Language Standards.

Course Evaluation: Rosetta Stone allows educators to review their students' progress via powerful reporting capabilities, which highlight areas in which individuals may be experiencing difficulty. This offers the opportunity to provide help when it's needed, while not delaying other students who may be achieving comprehension at a faster rate.

Information about time on task, time on test and scores for both practice and test exercises are stored for each student. Students may repeat any activity ensuring additional mastery and review each time.

Delivery Model: Asynchronous, Internet, Other (Students work independently on internet based activities that focus on rea

Student Interaction Monitored and Assessed: Each school and instructor can monitor their own students progress through Rosetta Stone. Access to all the reporting and setup features is internet based allowing easy access from most internet connected computer.

Methods of Student Contact: Other (School/Teacher checks progress): As Needed

---

Course Name: Portuguese, Level 1   Carnegie Units: 1.00

Description: Rosetta Stone follows a natural progression, beginning with lessons that assume the student has never been exposed to Portuguese. Rosetta Stone presents a set of four images that the student must correctly match to a spoken or written phrase or sentence in Portuguese. Introductory vocabulary becomes associated with familiar objects, actions and ideas. Words build to phrases, based upon imagery, with written and verbal clues presented. The lessons build upon each other, moving the student to deeper levels of literacy and comprehension. Students learn the basics required to achieve conversational proficiency in Portuguese. Topics cover the building blocks of language acquisition, ranging from singular nouns, affirmative and negative verb forms, to family relationships, numbers up to 100 and many other core language concepts. Each lesson builds systematically, using clear visual clues and material that the student has previously mastered. The language is introduced in a natural, easily recognized context which includes progressively complex vocabulary and grammatical skills, such as past, present and future verb tenses. Students are constantly exposed to the structure of Portuguese and acquire the proper grammar and usage modeled for them in Rosetta Stone.
A table of contents is available upon request.

---

Course Name: Portuguese, Level 2   Carnegie Units: 1.00

Description: Still following a natural progression, Rosetta Stone, Level 2 Portuguese builds language skills to include more complex grammar and subject matter. Conversation skills such as the ability to greet others, ask questions, use passive voice and use subjunctive and subordinate clauses are important additions to literacy. The ability to discuss travel, transportation and transactions as well as the weather and appropriate clothing, further enhances students' ability to interact. Level 2 further introduces shopping activities and terminology, imperatives, sickness and health, and the five senses. Level 2 also introduces idiom, humor and sarcasm. Every curriculum lesson has activities that develop reading, writing, listening and speaking. Upon completion of this level, the student should have achieved advanced literacy. A table of contents is available upon request.

Course Name: AP Chemistry   Carnegie Units: 1.00
Description: http://www.keystonehighschool.com/courses/details.php?id=97
Curriculum Alignment?   No   Alignment Process:
Course Evaluation: The Distance Education and Training Council and the Northwest Association of Accredited Schools accredit our institution, effective
through 2009. The choice to adhere to an accrediting body's third party review is our commitment to quality educational programs. Keystone's course development process, as well as all courses, are reviewed and evaluated during a 5-year accreditation cycle. Between the 5-year review timeframes, Keystone is required to respond to the review cycle recommendations in order to enhance our courses or development process, as defined in the previous review. Additionally, internal reviews occur as textbook and curriculum modifications become available, and when feedback is received suggesting corrective revisions or enhancements.
Delivery Model: Asynchronous, Internet
Student Interaction Monitored and Assessed: Upon hire, new teachers attend a face-to-face orientation and training session where all policies are reviewed. The Instructional Model policy, in particular, ensures effective teaching and learning by focusing on superior assessment feedback, high quality instruction, and effective communication. Following orientation and training, new teachers undergo a 30-day mentorship period where performance, including student interaction and turn around time, is monitored and evaluated by the Instructional Supervisor on a daily basis. After completing the mentorship period, the Instructional Supervisor continues to conduct performance checks on a regular basis to ensure teachers are adhering to the Keystone National High School Instructional Model policy.
Methods of Student Contact: Telephone: As Needed
                                Snail Mail: As Needed

Description: http://www.keystonehighschool.com/courses/details.php?id=89

Curriculum Alignment?   No   Alignment Process:

Course Evaluation: The Distance Education and Training Council and the Northwest Association of Accredited Schools accredit our institution, effective
through 2009. The choice to adhere to an accrediting body's third party review is our commitment to quality educational programs. Keystone's course development process, as well as all courses, are reviewed and evaluated during a 5-year accreditation cycle. Between the 5-year review timeframes, Keystone is required to respond to the review cycle recommendations in order to enhance our courses or development process, as defined in the previous review. Additionally, internal reviews occur as textbook and curriculum modifications become available, and when feedback is received suggesting corrective revisions or enhancements.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: Upon hire, new teachers attend a face-to-face orientation and training session where all policies are reviewed. The Instructional Model policy, in particular, ensures effective teaching and learning by focusing on superior assessment feedback, high quality instruction, and effective communication. Following orientation and training, new teachers undergo a 30-day mentorship period where performance, including student interaction and turn around time, is monitored and evaluated by the Instructional Supervisor on a daily basis. After completing the mentorship period, the Instructional Supervisor continues to conduct performance checks on a regular basis to ensure teachers are adhering to the Keystone National High School Instructional Model policy.

Following orientation and training, new teachers undergo a
30-day mentorship period where performance, including student
interaction and turn around time, is monitored and evaluated by
the Instructional Supervisor on a daily basis. After completing
the mentorship period, the Instructional Supervisor continues to
conduct performance checks on a regular basis to ensure
teachers are adhering to the Keystone National High School
Instructional Model policy.

Keystone's course development process, as well as all courses, are reviewed and evaluated during a 5-year accreditation cycle. Between the 5-year review timeframes, Keystone is required to respond to the review cycle recommendations in order to enhance our courses or development process, as defined in the previous review. Additionally, internal reviews occur as textbook and curriculum

modifications become available, and when feedback is received suggesting corrective revisions or enhancements.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: Upon hire, new teachers attend a face-to-face orientation and training session where all policies are reviewed. The Instructional Model policy, in particular, ensures effective teaching and learning by focusing on superior assessment feedback, high quality instruction, and effective communication. Following orientation and training, new teachers undergo a 30-day mentorship period where performance, including student interaction and turn around time, is monitored and evaluated by the Instructional Supervisor on a daily basis. After completing the mentorship period, the Instructional Supervisor continues to conduct performance checks on a regular basis to ensure teachers are adhering to the Keystone National High School Instructional Model policy.

Course Name: Introduction to Technology   Carnegie Units: 1.00
Description: http://www.keystonehighschool.com/courses/details.php?id=49
Curriculum Alignment?   No   Alignment Process:
Course Evaluation: The Distance Education and Training Council and the Northwest Association of Accredited

Schools accredit our institution, effective
through 2009. The choice to adhere to an accrediting body's third party review is our
commitment to quality educational programs. Keystone's course development process, as
well as all courses, are reviewed and evaluated during a 5-year accreditation cycle.
Between the 5-year review timeframes, Keystone is required to respond to the review cycle
recommendations in order to enhance our courses or development process, as defined in
the previous review. Additionally, internal reviews occur as textbook and curriculum
modifications become available, and when feedback is received suggesting corrective
revisions or enhancements.

Delivery Model: Asynchronous, Print, Internet

Student Interaction Monitored and Assessed: Upon hire, new teachers attend a face-to-face orientation and
training session where all policies are reviewed. The
Instructional Model policy, in particular, ensures effective
teaching and learning by focusing on superior assessment
feedback, high quality instruction, and effective communication.
Following orientation and training, new teachers undergo a
30-day mentorship period where performance, including student
interaction and turn around time, is monitored and evaluated by
the Instructional Supervisor on a daily basis. After completing
the mentorship period, the Instructional Supervisor continues to
conduct performance checks on a regular basis to ensure
teachers are adhering to the Keystone National High School
Instructional Model policy.

Curriculum Alignment?   No   Alignment Process:
Course Evaluation: The Distance Education and Training Council and the Northwest Association of Accredited
                          Schools accredit our institution, effective
                          through 2009. The choice to adhere to an accrediting body's third party review is our
                          commitment to quality educational programs. Keystone's course development process, as
                          well as all courses, are reviewed and evaluated during a 5-year accreditation cycle.
                          Between the 5-year review timeframes, Keystone is required to respond to the review cycle
                          recommendations in order to enhance our courses or development process, as defined in
                          the previous review. Additionally, internal reviews occur as textbook and curriculum
                          modifications become available, and when feedback is received suggesting corrective
                          revisions or enhancements.
Delivery Model: Asynchronous, Print, Internet
Student Interaction Monitored and Assessed: Upon hire, new teachers attend a face-to-face orientation and
                                                       training session where all policies are reviewed. The
                                                       Instructional Model policy, in particular, ensures effective
                                                       teaching and learning by focusing on superior assessment
                                                       feedback, high quality instruction, and effective communication.
                                                       Following orientation and training, new teachers undergo a
                                                       30-day mentorship period where performance, including student
                                                       interaction and turn around time, is monitored and evaluated by
                                                       the Instructional Supervisor on a daily basis. After completing
                                                       the mentorship period, the Instructional Supervisor continues to
                                                       conduct performance checks on a regular basis to ensure
                                                       teachers are adhering to the Keystone National High School
                                                       Instructional Model policy.

Claire Althoff   Current License From: ND

Courses Taught:

Course Name: Personal Management   Carnegie Units: 0.50

Description: This course provides an overview of the skills, experiences, and responsibilities needed to live independently. A wide variety of topics are covered including housing, buying and insuring a vehicle, banking and saving money, and job hunting. Project-based learning activities provide students with real-life experiences.

11 lessons, 3 unit tests, final exam (print course)
11 lessons, final assessment (online course)

Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In addition, each course has been compared and correlated to the Montana standards.

Course Evaluation: Course authors are required to align courses to national standards. Next, the instructional designer reviews each course to ensure that each standard has been addressed and met. Finally, the NDIS principal verifies content and standard alignment.

Delivery Model: Asynchronous, Print, Internet

Student Interaction Monitored and Assessed: Each student is required to have a testing supervisor. All items that are graded and returned from the NDIS instructors are sent to this supervisor. The supervisor is responsible for monitoring interaction between the student and the instructor.

In addition, instructor comments are monitored periodically by the administration to ensure that they are sufficient, appropriate, and effective. Each instructor is required to submit written copies of his/her comments to students at different times throughout the year.

Course Name: Literature for Reluctant Readers   Carnegie Units: 0.50

Description: Literature for Reluctant Readers is designed for those students who find reading boring, frustrating, or overwhelming. The intent of this course is to help students overcome negative reading experiences. As an introduction to literature, this course will teach students how to recall and understand what they have read. It will help them understand imagery, figurative language, and symbolism, and will help students strengthen their vocabularies. A considerable amount of time will be spent discussing and analyzing the themes of the selections. In addition, students will be expected to make inferences and to think and respond critically to the short stories, plays, poems, persona essays, and folk tales that will be covered.

Course Name: Physics, First Semester   Carnegie Units: 0.50
Description: Prerequisites: One year of algebra and one year of geometry
Motion (linear and circular), forces, torque, energy and power, phases of matter, heat measurements, the gas laws, and an introduction to electricity and circuits are covered in this course. An emphasis is placed on both quantitative calculations and qualitative understanding. Vector methods will be used to solve problems throughout the course. A review lesson on vectors is included.

14 lessons, 4 labs, 4 unit test, research report, final exam
Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In addition, each course has been compared and correlated to the Montana standards.
Course Evaluation: Course authors are required to align courses to national standards. Next, the instructional designer reviews each course to ensure that each standard has been addressed and met. Finally, the NDIS principal verifies content and standard alignment.

Course Name: Driver Education   Carnegie Units: 0.25

Description: This course helps students develop proper driving attitudes, acquire a general knowledge of the operation and maintenance of an automobile, and learn basic traffic laws. Students outside North Dakota who want to use this course to meet state education requirements are encouraged to first check with their state's Motor Vehicle Department to verify the course will meet state requirements.

NORTH DAKOTA RESIDENTS - NDAC 37-03-04-02 requires that a minimum of 30 hours of classroom instruction (described above) and a minimum 6 hours of supervised behind-the-wheel (BTW) instruction be successfully completed in order for students to receive credit and a certificate of completion. In North Dakota, BTW must be taught by a credentialed driver education instructor and students must be at least 14 years of age.

No credit is issued for the course described above UNLESS proof of BTW training is provided. Upon successful completion of the course and proof of BTW training, the student will receive ½ (.50) credit.

NON-RESIDENTS - Nonresident students who successfully complete the course described above will receive ¼ (.25) credit. Nonresident students who successfully complete the course described above AND provide proof of BTW training will receive ½ (.50) credit.

10 lessons, 4 unit tests, final exam

Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In addition, each course has been compared and correlated to the Montana standards.

Annette Marchand   Current License From: ND

Courses Taught:

Course Name: Advanced Drawing   Carnegie Units: 0.50

Description: This art course will continue the process begun in Basic Drawing, promoting good drawing
                     skills. Students will create drawings from observation and from their imaginations. Portrait
                     drawing, colored pencil techniques, and cartooning are three units that are fully explored
                     within the lessons. Projects emphasize good composition and organization of design
                     elements. This drawing course is for students who already possess drawing skills or have
                     completed a basic drawing course.

                     11 lessons, final exam

Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In
                                                           addition, each course has been compared and
                                                           correlated to the Montana standards.

Course Evaluation: Course authors are required to align courses to national standards. Next, the instructional
                     designer reviews each course to ensure that each standard has been addressed and met.
                     Finally, the NDIS principal verifies content and standard alignment.

Delivery Model: Asynchronous, Print

Student Interaction Monitored and Assessed: Each student is required to have a testing supervisor. All items
                                                       that are graded and returned from the NDIS instructors are sent
                                                       to this supervisor. The supervisor is responsible for monitoring
                                                       interaction between the student and the instructor.

                                                       In addition, instructor comments are monitored periodically by
                                                       the administration to ensure that they are sufficient, appropriate,
                                                       and effective. Each instructor is required to submit written
                                                       copies of his/her comments to students at different times
                                                       throughout the year.

Course Name: Geometry, Second Semester   Carnegie Units: 0.50

Description: The second semester continues the study of the basic concepts of geometry. The student studies quadrilaterals, transformations, circles, areas of polygons and circles , and surface area and volume of three-dimensional figures. Problem solving continues to be emphasized.

11 lessons, 3 unit tests, 1 project, final exam

Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In addition, each course has been compared and correlated to the Montana standards.

Course Evaluation: Course authors are required to align courses to national standards. Next, the instructional designer reviews each course to ensure that each standard has been addressed and met.

Finally, the NDIS principal verifies content and standard alignment.

Delivery Model: Asynchronous, Print, Internet

Student Interaction Monitored and Assessed: Each student is required to have a testing supervisor. All items that are graded and returned from the NDIS instructors are sent to this supervisor. The supervisor is responsible for monitoring interaction between the student and the instructor.

In addition, instructor comments are monitored periodically by the administration to ensure that they are sufficient, appropriate, and effective. Each instructor is required to submit written copies of his/her comments to students at different times throughout the year.

Course Name: Prealgebra, First Semester   Carnegie Units: 0.50

Description: This course is for the student who is new to algebra or desires a review and better understanding of the foundation topics before taking an algebra course. It includes an arithmetic review and incorporates geometry topics, variables and expressions, equations, and application problems using integers, fractions, and decimals. Additional attention is given to solving logic problems. A calculator is not needed for the first semester and is not allowed while taking the unit tests.

Online System Requirements – Pentium Multimedia PC; Windows 95 or higher; Internet connection with a 56k modem or above; Web browser(Internet Explorer 5.0 or above or Netscape 4.7); 32mb RAM.

A Student Starter Kit for the online textbook contains the access code and instructions for accessing the online textbook. The online textbook includes video lectures, practice problems, and tutorial examples. The access code is good for accessing both semesters of Prealgebra.

Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In addition, each course has been compared and correlated to the Montana standards.

Course Evaluation: Course authors are required to align courses to national standards. Next, the instructional designer reviews each course to ensure that each standard has been addressed and met. Finally, the NDIS principal verifies content and standard alignment.

Course Name: Sophomore Literature   Carnegie Units: 0.50

Description: All of the literature selections for this course have been chosen because they deal with life experiences shared by people of all times and places. The readings and related assignments are specially designed to encourage practical thinking skills, daily life skills, and work-related skills. Each of the assigned readings will connect, in some way, with the student's own experiences, interests, and future life goals. There is practice of the reading, writing, listening, and speaking skills expected by employers, clients, colleagues, and neighbors. Thinking skills are refined. The textbook and the written work ask for application in a way that reflects daily life.

10 lessons, 5 unit tests, final exam

Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In addition, each course has been compared and correlated to the Montana standards.

Course Evaluation: Course authors are required to align courses to national standards. Next, the instructional designer reviews each course to ensure that each standard has been addressed and met. Finally, the NDIS principal verifies content and standard alignment.

Delivery Model: Asynchronous, Print, Internet

Student Interaction Monitored and Assessed: Each student is required to have a testing supervisor. All items that are graded and returned from the NDIS instructors are sent to this supervisor. The supervisor is responsible for monitoring interaction between the student and the instructor.

In addition, instructor comments are monitored periodically by the administration to ensure that they are sufficient, appropriate, and effective. Each instructor is required to submit written copies of his/her comments to students at different times throughout the year.

Wright Stacey   Current License From: ND

Courses Taught:

Course Name: Algebra, First Semester   Carnegie Units: 0.50

Description: Algebra is the most basic branch of mathematics. This course makes the connection between, and the transition from , arithmetic to algebra. It explains the laws that govern the other branches of mathematics. The first semester covers topics and everyday applications: using the language of algebra, operations of real numbers, solving multiple-step equations, graphing linear equations, solving and graphing inequalities, and solving systems of equations. This course is a prerequisite for Geometry and Advanced Algebra. A scientific calculator is required for the course.

14 lessons, 4 unit tests, final exam

Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In

addition, each course has been compared and correlated to the Montana standards.

Course Name: Algebra, Second Semester   Carnegie Units: 0.50

Description: The second semester relies on the students understanding the topics introduced in the first semester and expands those into operations with polynomials including adding, subtracting, multiplying, dividing, and factoring polynomials. This leads to solving quadratic equations using completing the square, factoring, or the quadratic formula, as well as applying these methods to real-world problems. The Pythagorean Theorem is studied in addition to applying trigonometry to solving right triangles. Simplifying and performing operations with rational expressions is incorporated into solving rational equations and work problems An introduction to statistics and probability rounds out the course. A scientific calculator is required for the course.

14 lessons, 4 unit tests, final exam

Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In addition, each course has been compared and correlated to the Montana standards.

Courses Taught:

Course Name: AP Biology, First Semester   Carnegie Units: 0.50

Description: In AP Biology, the student will build the conceptual framework necessary to understand science as a process. The content is divided into three sections with correlating laboratory exercises: molecules and cells; heredity and evolution; and organisms and populations. Students will also explore energy transfer continuity and change, the relationship of structure to function, regulation, interdependence in nature, and the balance of science, technology, and nature.

The first semester of this course consists of seven units. Each unit, in turn, consists of a variety of study sessions, practice exercises, labs, graded quizzes, and concludes with a unit test. In addition, several diagnostic tests are used throughout the course to check the student's understanding of material covered. At the end of Unit 7, the student will take a two-hour examination.

Curriculum Alignment?   Yes   Alignment Process: All content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Course Evaluation: This course was written by APEX Learning Center.

Apex Learning's online curriculum is organized into semesters, units, lessons, and activities. A typical semester has 5-6 units, each with 5-6 lessons. A lesson comprises a number of activities that may include studies, practices, readings, journals, labs, discussions, projects, web explorations, reviews, and both computer- and teacher-graded assessments, including unit diagnostics.

Each semester offers approximately 100-120 hours of instructional material with an average of 750 pages, 1,000 images, 250 multimedia tutorials, 250 interactive exercises, 50 computer-graded assessments, and 85 vetted web links.

In each subject area, the instructional content is based on relevant national standards, the Standards for Success, and key state standards. Correlations to specific state standards are available on request.

Delivery Model: Asynchronous, Internet

Student Interaction Monitored and Assessed: Each student is required to have a testing supervisor. All items that are graded and returned from the NDIS instructors are sent to this supervisor. The supervisor is responsible for monitoring interaction between the student and the instructor.

In addition, instructor comments are monitored periodically by the administration to ensure that they are sufficient, appropriate, and effective. Each instructor is required to submit written copies of his/her comments to students at different times throughout the year.

                                 Snail Mail: As Needed

Course Name: AP Biology, Second Semester   Carnegie Units: 0.50

Description: The second semester will continue to build the student's understanding of science as a process. After completing an additional six units in this semester, the course will conclude with a thorough review of all the material covered in both semesters. The student will then take a three-hour examination.

After completing both semesters of this course, the student will be well prepared for the AP Biology Examination.

Curriculum Alignment?   Yes   Alignment Process: All content aligns to the scope and sequence specified by the College Board and to widely used textbooks.

Course Evaluation: This course was written by APEX Learning Center.

Apex Learning's online curriculum is organized into semesters, units, lessons, and activities. A typical semester has 5-6 units, each with 5-6 lessons. Jayne Wallace   Current License From: ND

Courses Taught:

Course Name: Literature for Reluctant Readers   Carnegie Units: 0.50

Description: Literature for Reluctant Readers is designed for those students who find reading boring, frustrating, or overwhelming. The intent of this course is to help students overcome negative reading experiences. As an introduction to literature, this course will teach students how to recall and understand what they have read. It will help them understand imagery, figurative language, and symbolism, and will help students strengthen their vocabularies. A considerable amount of time will be spent discussing and analyzing the themes of the selections. In addition, students will be expected to make inferences and to think and respond critically to the short stories, plays, poems, persona essays, and folk tales that will be covered.

12 lessons, 4 unit tests, final exam

Curriculum Alignment?   Yes   Alignment Process: The course is aligned to national standards. In addition, each course has been compared and correlated to the Montana standards.

Course Evaluation: Course authors are required to align courses to national standards. Next, the instructional designer reviews each course to ensure that each standard has been addressed and met. Finally, the NDIS principal verifies content and standard alignment.

Course Name: Spanish II	Carnegie Units: 1.00

Description: < http://www.k-state.edu/ecc/svs/map.html >

Students review and refine basic skills as they expand the number of topics about which they can converse and understand others with more accuracy. Topics include: community, entertainment, the environment, celebrations, school activities, daily routines, hygiene, sports, and childhood. Instruction is primarily in the target language as appropriate for the given activity.

Curriculum Alignment?   Yes   Alignment Process: Students regularly engage in learning activities that reflect the 5 Cs of the National Foreign Language Standards. Of those, the Communication, Culture, and Comparisons Cs receive the greatest emphasis. The Cs of Connections and Communities are integrated whenever possible.

Course Evaluation: 1)   Participating schools provide regular feedback through ongoing communication regarding student performance compared to stated goals. 2) Ongoing internal review of student progress (as measured by reported and provider-assessed scores) suggests action items for change and improvement. 3) An annual written evaluation is conducted is done on-line in survey form.

Delivery Model: Synchronous, Print, Mailed

Student Interaction Monitored and Assessed: The on-site adult co-learner (the Teaching Partner) is in regular contact with the SVS instructor and staff, and oversees the daily activities of the students. He or she conducts regular objective evaluations on-site, while oral skills are monitored by SVS staff in regular phone lessons and student recordings submitted for evaluation.

                                 Snail Mail: As Needed

Course Name: 10th Grade English 2   Carnegie Units: 0.50
Description: Students review before learning new information about the fundamentals of grammar and composition and the study of literature. In the literature lessons, students read short stories, essays and biographies, Julius Caesar and John Steinbeck's The Pearl.

In the grammar and composition lessons, students concentrate on the patterns, structures, kinds and purposes of sentences; on additional ways to punctuate sentences and on developing polished papers.

Curriculum Alignment?   No   Alignment Process: Courses are written to Nebraska standards which reflect National standards. Information specific to Montana alignment is available upon request.
Course Evaluation: Courses are developed by Instructional Design and Development within the Office of Extended Education and Outreach. It is their primary responsibility to ensure the quality of course content.
Delivery Model: Asynchronous, Print, Other (The course management system used at the Independent Study High Schoc
Student Interaction Monitored and Assessed: Each student has a local proctor who is able to oversee student progress. In addition, members of the instructional service staff review gradebooks and contact students/proctors as needed.
Methods of Student Contact: Telephone: As Needed
                                 Snail Mail: As Needed

Course Name: 11th Grade English 1   Carnegie Units: 0.50
Description: The historical development of American literature from the colonial period to 1900 is the central theme of this course. Students gain an understanding of the ideas that fostered the growth of the United States and of the ways in which its literature became distinctively American. Students develop composition skills by analyzing the literary selections and applying the basic organizational pattern of a good essay.

Curriculum Alignment?   No   Alignment Process: Courses are written to Nebraska standards which

Course Name: AP English Literature and Composition 1   Carnegie Units: 0.50

Description: In-depth exploration of English and American literature. Poetry, short stories, drama, novels,
                   and literary essays are analyzed. In addition to discussing works form each of these literary
                   genres, the course concentrates on helping students to form their own interpretations of
                   literary works. Advanced Placement Literature and Composition 1 is the first course in a
                   two-course sequence designed to prepare students for the College Board Advanced
                   Placement English Literature and Composition Examination. Accordingly, the written projects
                   in the course emphasize the analysis of literary excperts, and the course devotes much time
                   to the use and interpretation of literary devices. While this course helps prepare students for
                   the College Board Examiniation, this examination is NOT required for completion of

Advanced Placement Literature and Composition 1.

Course Name: AP English Literature and Composition 2　　Carnegie Units: 0.50

Description:　　Advanced Placement English Literature and Composition 2 is the second course in a two-course sequence designed to prepare students for the College Board Advanced Placement English Literature and Composition Examination. The course emphasizes writing and literary analysis, teaching students to express their interpretations in written form. Poetry, short stories, novels, drama, and expository prose are covered. In addition to the graded assignments, the course includes many non-graded activities that will prepare students for the College Board examination, including a practice test that will let students practice testing in a timed environment. Although Advanced Placement English Literature and Composition 2 prepares students for the College Board examination, students ARE NOT required to complete this examination to receive credit for the course.

Curriculum Alignment?　　No　　Alignment Process:　　Courses are written to Nebraska standards which reflect National standards. Information specific to Montana alignment is available upon request.

Course Name: AP U.S. History 2　　Carnegie Units: 0.50

Description:　　This course is designed to help prepare students for the College Board Advanced Placement United States History Examination. The written projects emphasize historic essays and document-based questions. Each lesson contains three self-check tests that allow the student to test his or her objective knowledge as well as develop analytical skills and writing abilities. Also, the course includes a comprehensive review lesson and gives the student much experience in working with primary source documents. Because AP History 1 and AP History 2 are a two-course sequence, AP History 2 will provide students with copies of the 2001 AP United States History Examination. This examination covers American history from the colonial era until the present. Although the 2001 AP United States History Examination will not affect the student's grade in this course, students will be able to use the examination as a review. AP History 2 explores the social, political and economic development of the United States from the late 1800s until today. The student will study the development of the American market economy, urban growth, progressive reform, the Great Depression, the New Deal programs, the relationship between government and private business, civil rights issues, cultural diversity and American foreign relations.

Curriculum Alignment?　　No　　Alignment Process:　　Courses are written to Nebraska standards which reflect National standards. Information specific to Montana alignment is available upon request.

                     student much experience in working with primary source documents. The course explores
                     the social, political and economic development of the United States from the Colonial Era
                     until 1877. The student will study European colonization, the American Revolution, the
                     formation of the American political system, agricultural and industrial trends, westward
                     expansion, social conditions and the mounting differences between the northern and
                     southern regions of the country. The course discusses the Civil War and concludes with a
                     survey of the Reconstruction process through which the southern states were readmitted to
                     the Union.

Course Name: World Geography 2   Carnegie Units: 0.50

Description: Note: World Geography 1 and 2 may be taken in any sequence.

This course deals with three geographic regions: Europe, Australia/Oceania and Asia. Students learn how the topography, climate and natural resources of each region influence the lives of people. They also learn how the people of a region devise a mode of existence by reacting to and modifying their natural surroundings.

Throughout the course students use such geographic skills as reading and drawing maps, analyzing charts and diagrams and interpreting technical vocabulary.

Curriculum Alignment?   No   Alignment Process: Courses are written to Nebraska standards which reflect National standards. Information specific to Montana alignment is available upon request.

Course Evaluation: Courses are developed by Instructional Design and Development within the Office of Extended Education and Outreach. It is their primary responsibility to ensure the quality of course content.

Delivery Model: Asynchronous, Print, Other (The course management system used at the Independent Study High Schoc

Student Interaction Monitored and Assessed: Each student has a local proctor who is able to oversee student progress. In addition, members of the instructional service staff review gradebooks and contact students/proctors as needed.

Methods of Student Contact: Telephone: As Needed

Course Name: World History 1   Carnegie Units: 0.50

Description: Students learn about both the history and cultures of Western and non-Western worlds. Special attention is given to the civilizations that developed in India, China, Africa and Latin America from ancient to recent times. The contributions that each culture made to world civilization are stressed.

Curriculum Alignment?   No   Alignment Process: Courses are written to Nebraska standards which reflect National standards. Information specific to Montana alignment is available upon request.

Course Name: World History 2   Carnegie Units: 0.50

Description: The history of the Western and non-Western worlds from about 1750 to the present is the subject of this course. Students begin by examining the social and political upheavals that revolutionized Western civilization and signaled the end of absolutism. Then they consider the growth of democracy and nationalism, the causes and effects of the Industrial Revolution, the "new" imperialism and the two world wars. They conclude with a discussion of postwar problems and recent developments that have had global impact.

Course Name: Introduction to Algebra Part 1 and 2   Carnegie Units: 1.00
Description: USDLC/Lincoln Interactive courses are built as semester courses with 90 hours of
                   instruction (.5 credits). Parts 1 and 2 combine for a full year's course totaling 180 hours of
                   instruction.

                   Introduction to Algebra with GEARS provides students with a solid foundation for Algebra I.
                   This course takes the students through the basic operations of adding, subtracting,
                   multiplying, and dividing whole numbers, integers, fractions, and decimals. This course
                   emphasizes the use of technology, problem solving, critical thinking, and reasoning.
                   Students will solve basic algebraic equations and be introduced to the geometry and
                   statistics needed for future mathematical studies.

                   The simulation aspect of the course will engage the students in an interactive 3D world. The
                   simulation allows students to apply skills learned in the course and reinforce key concepts.
Curriculum Alignment?   Yes   Alignment Process: Yes. All USDLC/Lincoln Interactive Courses are aligned
                                                              to the national, ISTE, and DOD Standards and
                                                              correlated to the Montana Standards.
Course Evaluation: All USDLC/Lincoln Interactive courses undergo a three-tier audit by the Tri-State Area
                       School Study Council of the University of Pittsburgh. Lincoln Interactive is also being
                       recommended for CITA Accreditation. This will become official after their board meeting at
                       the end of January.
Delivery Model: Asynchronous, Internet
Student Interaction Monitored and Assessed: All USDLC/Lincoln Interactive semester courses have 1000
                                                   points worth of assessment. Highly qualified teachers will

Courses Taught:

Course Name: Introduction to Screen Writing Part 1 and 2   Carnegie Units: 1.00
Description: USDLC/Lincoln Interactive courses are built as semester courses with 90 hours of
                   instruction (.5 credits). Parts 1 and 2 combine for a full year's course totaling 180 hours of

instruction.

The screenplay is the starting point for every film, whether it is a five-minute short or a full-length motion picture. The writing of scripts is a craft that takes much time and dedication to master at the professional level, but the tools of both the novice and the accomplished screenwriter are the same. In this course, the learner will acquire, step by step, each of those tools--the necessary skills--to create an original screenplay. (Note: While this course is titled "Intro," the presumption is that the learner is proficient in composition and experienced in outlining a writing assignment.)

This course will present a complete guide to the fundamental elements that must be included in every motion picture screenplay. The student will learn cinematic storytelling basics, and how they are implemented in the creation of a screenplay, or "movie blueprint." Students will examine all screenplay components, from scene creation to dialogue to narrative flow across the length of a film. The course also prepares the student to create original screenplays, through full examination of all script elements, and also through scriptwriting exercises and tests. The textbook provides a foundation for all the required scriptwriting basics, and also in-depth analyses of how the script elements the students learn are employed in seven movie classics, ranging from E.T to Hamlet.

| Curriculum Alignment? | Yes | Alignment Process: | Yes. All USDLC/Lincoln Interactive Courses are aligned to the national, ISTE, and DOD Standards and correlated to the Montana Standards. |

Courses Taught:

Course Name: Introduction to Computer Programming Part 1 an   Carnegie Units: 1.00

Description: USDLC/Lincoln Interactive courses are built as semester courses with 90 hours of instruction (.5 credits). Parts 1 and 2 combine for a full year's course totaling 180 hours of instruction.

Introduction to Computer Programming and the Alice system represents a breakthrough in teaching object-oriented computing. In Alice, objects are easily visible because they are identified as three-dimensional humans, animals, furniture, etc. The state of Alice objects is changed via method calls such as "move forward one meter" or "turn left a quarter turn"--these messages are easily and intuitively understood by students. Computation is displayed via animations of these state changes. One can hardly imagine a better way to express the notion of embodying state in an object and using computation to change that state. One of Alice's real strengths is that it has been able to make abstract concepts concrete in the eyes of first-time programmers.

Courses Taught:
_____

Course Name: Introduction to College Writing Part 1 and 2   Carnegie Units: 1.00
Description: USDLC/Lincoln Interactive courses are built as semester courses with 90 hours of instruction (.5 credits). Parts 1 and 2 combine for a full year's course totaling 180 hours of instruction.

Introduction to college writing is designed for students who wish to continue onto college. After completing this course, students should be prepared for freshman composition. The skills covered in this course will provide a foundation for basic college writing. The primary focus is on informative and persuasive writing with attention to theses, organization, paragraphs, argumentative theories, research techniques, citation, and style. Besides the traditional essay genre, writing technique and etiquette in real-world applications such as abstracts, memos, and email, as well as in other content areas, are practiced throughout.
